# LINK & LOCK<sup>TM</sup> WALLS

#### **TYPICAL ISOMETRICS**

#### PROFILES

1-5/8" X 2", 4", 6", 8" HD 2" X 2", 4", 6", 8" 4"x4", 4"x6" Standard lengths: 24'

#### COMPONENTS

End Caps, Mounting Clips & Isolation Washers.

#### ATTACHMENT

#### FINISHES

Woodgrains, solid colors, naturally aged metals, special order. Custom solid color matching available (additional lead times apply).

#### BIM & CAD

RVT & DWG files available, see our website for details.

#### LEAD TIME

Most Popular Finishes -ready to ship within 1 week Additional Finishes -ready to ship within 14 weeks

#### Finishes

- Longboard Products are available in a wide range of powder coated finishes
- Custom solid colors are available upon request

Longboard extruded products are produced 1" (25mm) oversized, as one end is drilled for the coating process and both ends have 1/2" (12mm) of masking tape (woodgrains only) which must be cut off for best results.

#### **Expansion & Contraction**

Although interior applications likely will not experience a large degree of temperature change, it is good practice to follow the standard attachment procedure described in this guide. See **Appendix for Tables 1 & 2**, **expansion/contraction calculations per foot/meter of material.** 

#### Material Ordering & Delivery

|   | 0               | ,<br>,   |
|---|-----------------|--|
| • | Packaging:      | Link & Lock is sold by the set (pair) and in widths of 2", 4", 6", 8"<br>End caps are sold by the box: 20 caps/bx<br>End Mounts are sold by the box: 20 mounts/bx  |
| • | Ship/Receiving: | Most Popular Finishes -ready to ship within 1 week<br>Additional Finishes -ready to ship within 14 weeks<br>Delivered on 24' (7.3m) long skids weighing up to 2000 lbs. A mechanical lift with forks is<br>required on site to receive the order.  |
| • | QC:             | Always inspect the delivery for damage and contact LB ASAP if there<br>are any issues: <u>info@longboardproducts.com</u> or 1-800-604-0343 and include your PO#<br>and any pictures if possible. Mark the delivery receipt as "damaged" and accept the<br>delivery as-is. Longboard is not responsible for the installation of blemished or damaged<br>material. |

#### Storage & Handling

Be sure to store the material flat, keep it dry, safe & secure and remain in unopened cartons until ready to be installed. See **Appendix for proper handling and care instructions.** 

#### **Cleaning Recommendations**

- Initial and periodic cleaning for best looking product
- Basic methods use a combination of moderate water pressure, soft sponge/brush and a mild detergent (Safe for your hands, safe for the product)

▲ NEVER use aggressive, acid or alkaline cleaners on Longboard finishes. Do not use cleaners containing Trisodium Phosphate, Phosphoric Acid, Hydrochloric Acid, Hydrofluoric Acid, Fluorides, or any other compound that is known to react with metal.

\*See Cleaning Guide for full requirements & cleaning schedule: longboardproducts/resources/care-maintenance.com

#### Warranty

Upon substantial completion of the project, register for warranty online here: <u>longboardproducts.com/warranty</u>  $\triangle$  Registration is required for the warranty to be in effect.

#### Graffiti Removal

Note: Cleaning the surface with a cleanser that is not diluted as per instructions may result in damage to the coating.

#### **Components (Typical)**

The Link & Lock<sup>™</sup> system consists of two (2) matching L-shaped extrusions, snapped together to make a complete set. For all LB components go to <u>longboardproducts.com</u>.

## Link & Lock™ Battens

| Size   | 12'         | 24'         | End Caps<br>(20/box) | End Mounts<br>(20/box) |

## Tools

Commonly used tools for Link & Lock install.

| Table Saw with Carbide<br>Metal Blade Non-ferrous 60-<br>80T (for cutting aluminum) | Miter Saw with Carbide<br>Metal Blade Non-ferrous 60-<br>80T (for cutting aluminum) | Cordless Drill with clutch          | Jig Saw (for protrusions) |
|---|---|-------------------------------------|---------------------------|
|   | 0   |                                     |                           |
| Rubber Mallet (or Hammer)   | Level   | Hole Saw (for lighting<br>fixtures) | Quick Grip Bar Clamp      |

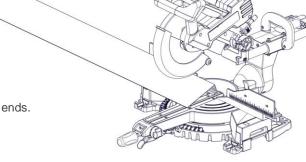

#### Cutting

Always be sure to wear appropriate PPE: eye & hearing protection.

Cut battens using a Miter Saw and Table Saw always allowing for expansion & contraction. Trim the taped/drilled ends of all stock length material by at least 1/2" (12mm) each end and discard.

▲ DO NOT Install Link & Lock without trimming the ends.

#### Fastening

Longboard Link & Lock<sup>™</sup> consists of two (2) matching L-shaped extrusions, snapped together to make a complete set. The back "L" is mechanically fastened to the substrate, using Longboard **Mounting Clips and Isolation Washers** fastened every **6-8' O.C. up to 12ft when using Stiffeners** with #12 (#14 for L&L HD) sharp-point screws (for wood substrates) or self-drilling (for metal substrates). The Mounting Clips and Isolation Washers are included in the order for 6' spacings.

Fasteners must be corrosion resistant and comply with all local building codes.

All fasteners should be suitable for exterior use and be compatible with the substrate type. Fasteners should be anchored into a solid secure substrate.

Layout and predrill the back "L" at all fastener locations.

Refer to **Preparation drilling for Install** for hole dimensions and further details.

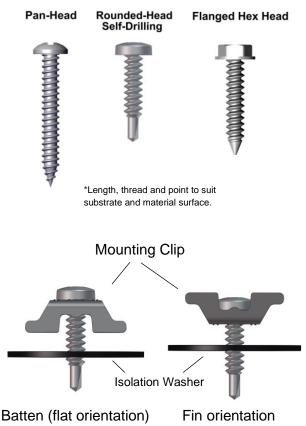

See Appendix for project specific fastener spacing:

Allowable Span - Tables 3-9

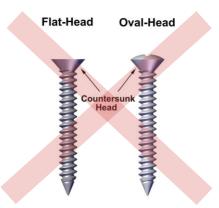

| Fastener Types/Sizes for L&L |          |          |  |  |  |  |
|------------------------------|----------|----------|--|--|--|--|
| L&L                          | Pan Head | Hex Head |  |  |  |  |
| 2"                           | #12      | #12      |  |  |  |  |
| 4"                           | #12      | #12      |  |  |  |  |
| 6"                           | #12      | #12      |  |  |  |  |
| 8"                           | #12      | #12      |  |  |  |  |
| 4"x4"                        | #12      | #12      |  |  |  |  |
| 4"x6"                        | #12      | #12      |  |  |  |  |
| 4" HD                        | #14      | #14      |  |  |  |  |
| 6" HD                        | #14      | #14      |  |  |  |  |
| 8" HD                        | #14      | #14      |  |  |  |  |

#### Fastener types

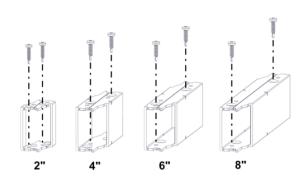

#### RECOMMENDED

#### **DO NOT USE**

| Fastener Types/Sizes for End Mounts |          |          |  |  |  |  |
|-------------------------------------|----------|----------|--|--|--|--|
| End Mount                           | Pan Head | Hex Head |  |  |  |  |
| 2"                                  | #10      |          |  |  |  |  |
| 4"                                  | #12      | #12      |  |  |  |  |
| 6"                                  | #12      | #12      |  |  |  |  |
| 8"                                  | #12      | #12      |  |  |  |  |
| 4" HD                               | #14      | #14      |  |  |  |  |
| 6" HD                               | #14      | #14      |  |  |  |  |
| 8" HD                               | #14      | #14      |  |  |  |  |

#### **Framing requirements**

Always consult your local building authority and follow local building code requirements. See Typical dimensions for sizes and weights of the L&L system.

#### **Wood Framing**

• Size: 2x4 minimum

#### **Metal Framing**

• Gauge: 18 ga. minimum

#### Concrete/CMU

Wood or metal furring is recommended over concrete and CMU.

Wood Furring:

• Size: 2x2 minimum

#### Metal Furring:

- Size: 18 ga. minimum
- Type: Hat channel, c-stud, or z-furring

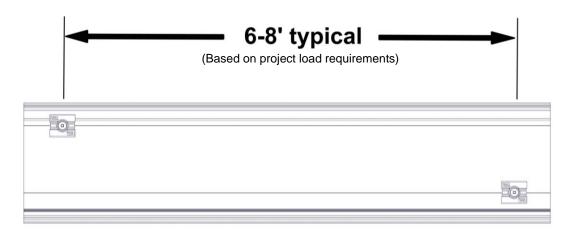

#### Install details

Typical dimensions

| L&L   | Width        | Depth           | Length  | Weight(Ibs/LF) *per set |
|-------|--------------|-----------------|---------|-------------------------|
| 2"    | 2" (50.8mm)  | 1 5/8" (41.3mm) | 12'/24' | 0.93                    |
| 4"    | 4" (101.6mm) | 1 5/8" (41.3mm) | 12'24'  | 1.3                     |
| 6"    | 6" (152.4mm) | 1 5/8" (41.3mm) | 12'/24' | 1.6                     |
| 8"    | 8" (203mm)   | 1 5/8" (41.3mm) | 12'/24' | 1.9                     |
| 4"x4" | 4" (101.6mm) | 4" (101.6mm)    | 12'/24' | 1.8                     |
| 4"x6" | 6" (152.4mm) | 4" (101.6mm)    | 12'/24' | 2.1                     |
| 4" HD | 4" (101.6mm) | 2" (50.8mm)     | 12'/24' | 1.7                     |
| 6" HD | 6" (152.4mm) | 2" (50.8mm)     | 12'/24' | 2.4                     |
| 8" HD | 8" (203mm)   | 2" (50.8mm)     | 12'/24' | 3                       |

• Longboard Link & Lock system typical dimensions:

- It is good practice to leave a 1/4" (6mm) gap between every component joint or 24' (7.3m) to allow for expansion & contraction. Consider the joints where components meet each other to dictate which component is installed first (eg: right angle butt joints, mitered joints etc.).
- Mounting Clips and Isolation Washers allow for movement of the battens, to expand & contract during thermal changes.
- Fasten Mounting Clips every 6-8' typical (based on project wind load requirements), alternating from top to bottom for battens using die lines for guides.

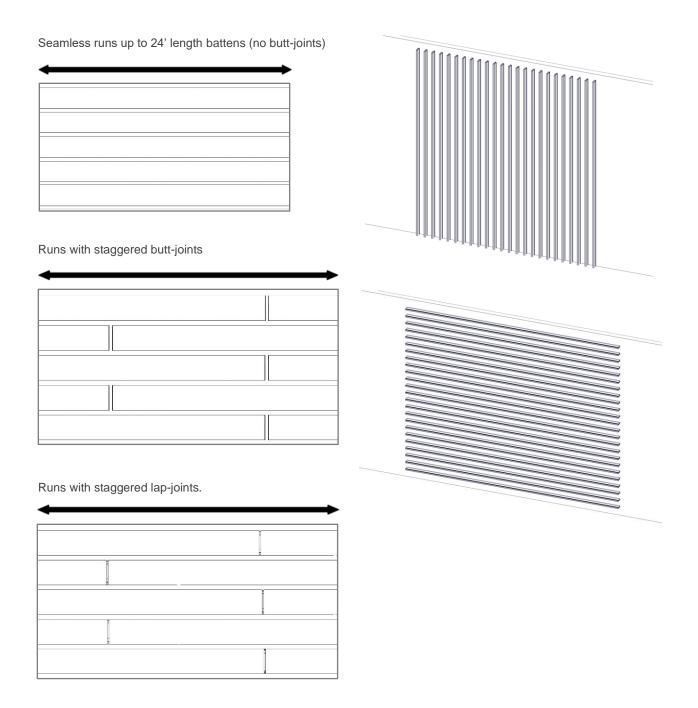

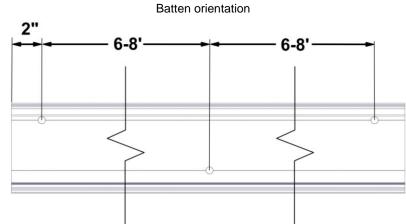

Attachment points using Mounting Clips

#### Perimeter and field area limitations

Measure and layout your wall area to consider Link & Lock alignment with fixtures, penetrations, and adjacent walls, for desired appearance. The same methodology applies for vertical installations.

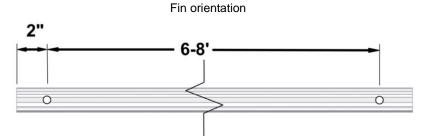

To prepare Link & Lock for install, layout and predrill the back "L" with 1/2" holes every 6-8' O.C. typical, with the first hole 2" in from the end to allow space for the End Cap.

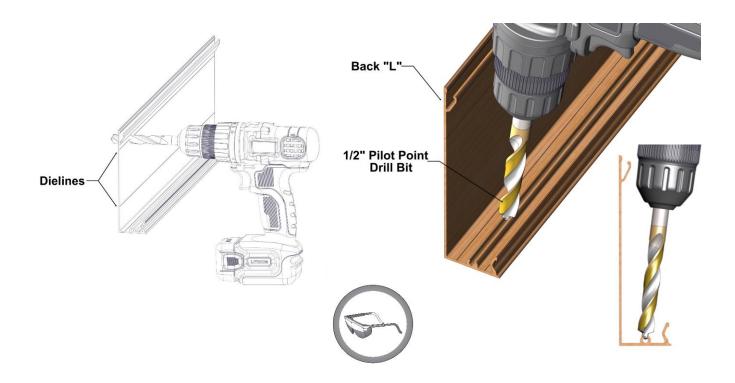

For the Batten orientation, alternate the holes from top to bottom using the Dielines for guides.

For Fin orientation, use Pilot Point Drill Bit (see below) as recommended for ease of drilling.

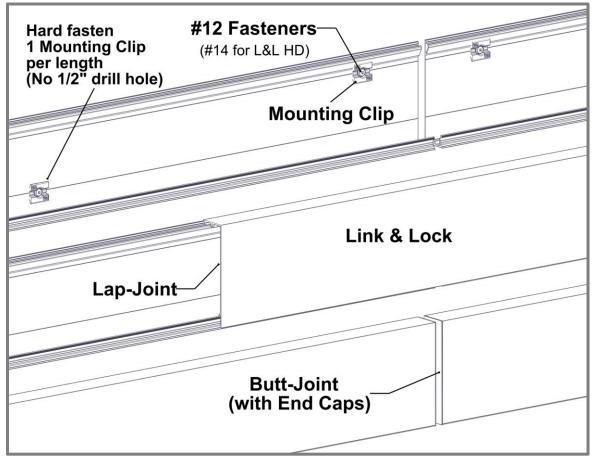

Note: To hard fasten 1 location per length, omit the drilled hole at that location and use for hard fastening.

See Appendix for project specific fastener spacing: Allowable Span - Tables 3-9

- A BUTT-JOINTS. When installing butt-joints, ensure to leave a 1/4" (6mm) min. gap. every 24' (7.3m) min.
  (See Detail A). Fasteners should be anchored into a solid secure framing member, blocking, furring strip, or backer plate, etc.
- AP-JOINTS. When installing lap-joints, ensure to leave a 1/4" (6mm) min. gap. every 24' (7.3m) min.
  (See Detail A). Fasteners should be anchored into a solid secure framing member, blocking, furring strip, or backer plate, etc.
- If needed, use touch-up paint pens (purchased separately) to finish the ends at the butt-joint or lap-joint.
- It is good practice to hard-fasten each back "L" at one point per length typically near the center, to keep the battens from migrating.
- DO NOT hard-fasten more than one (1) location per batten.

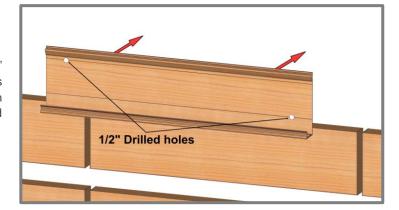

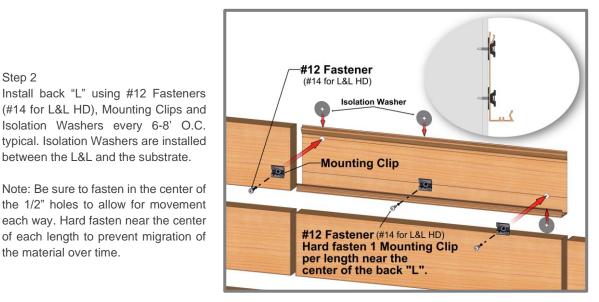

Detail A

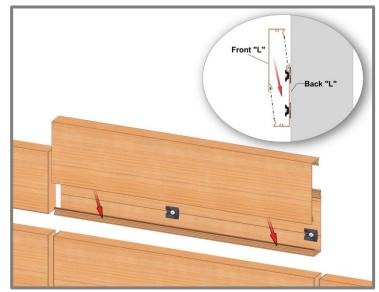

Step 1

Place predrilled Link & Lock back "L" into position (Drilling page 11). It is good practice to check your installation every 2-3 rows for level/plumb and flat/straight, for best results.

Cut off Taped/Drilled L&L ends (1/2" each end).

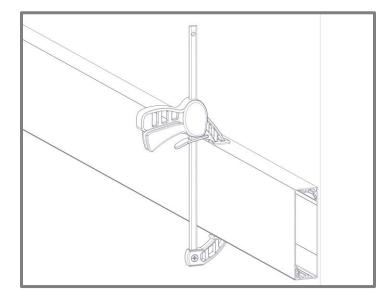

Step 2

(#14 for L&L HD), Mounting Clips and Isolation Washers every 6-8' O.C. typical. Isolation Washers are installed between the L&L and the substrate.

Note: Be sure to fasten in the center of the 1/2" holes to allow for movement each way. Hard fasten near the center of each length to prevent migration of the material over time.

#### Step 3

Install front "L" and snap it into place, aligning it with ends and joints. If necessary, use a rubber mallet or hammer and block to protect the finish.

#### Step 3.1

Use clamps with rubber pads as common practice to securely snap the front "L" onto the back "L".

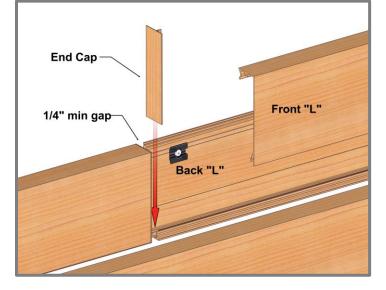

#### Step 4

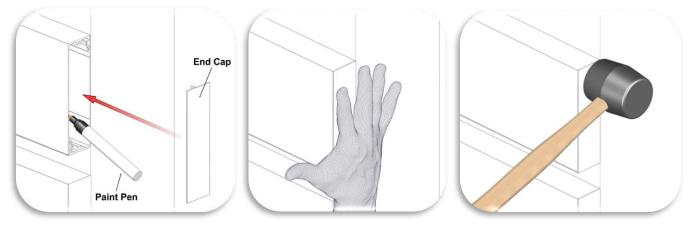

Install End Caps, which are friction fit, by pressing them into place using the palm of your hand. If necessary, use a rubber mallet to snap them into place. See below images.

Use paint pens to coat Link & Lock cut ends that may show slightly beyond the End Caps.

Consider your application sequence of the End Caps before installing adjacent Link & Lock members, as they may limit the space needed to insert the caps. In this situation you may need to install the caps first then the front "L" as seen in the image to the right.

▲ TIP: Use shim to hold/secure cap while snapping in the front "L".

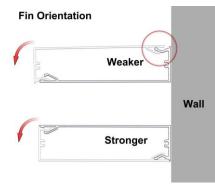

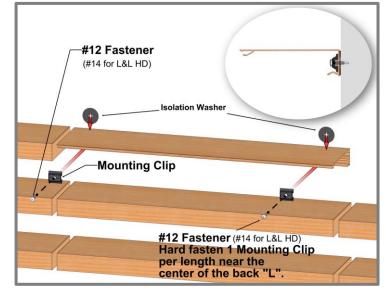

#### Step 1

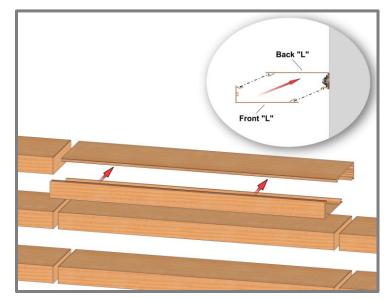

Place predrilled Link & Lock back "L" into position (Drilling page 11). It is good practice to check your installation every 2-3 rows for level/plumb and flat/straight, for best results.

(1/2" each end).

Cut off Taped/Drilled L&L ends

#### Step 2

Install back "L" using #12 Fasteners (#14 for L&L HD) and Mounting Clips and Isolation Washers every 6-8' O.C. typical. Isolation Washers are installed between the L&L and the substrate.

Note: Be sure to fasten in the center of the 1/2" holes to allow for movement each way. Hard fasten near the center of each length to prevent migration of the material over time.

#### Step 3

Install front "L" and snap it into place, aligning it with ends and joints. If necessary, use a rubber mallet or hammer and block to protect the finish.

#### Step 4

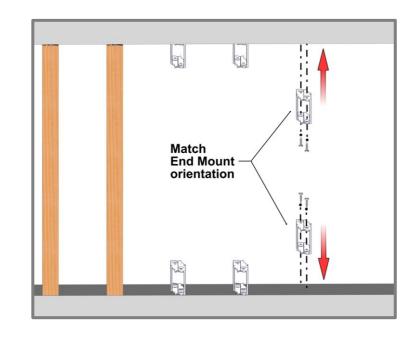

Refer to Page 14 for End Cap install and considerations.

Install End to End orientation Note: Use Tables 3-9 in Appendix for Allowable Span.

#### Step 1

Place End Mounts into position at the top and bottom of the install. It is good practice to check your installation every 2-3 rows for level/plumb and flat/straight, for best results.

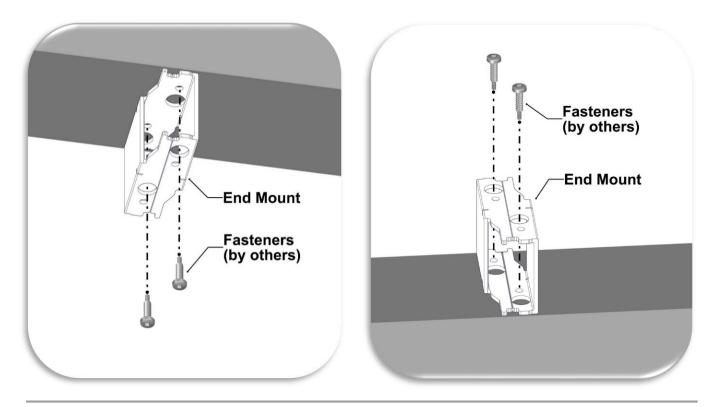

| Fastener Types for End Mounts |             |             |  |  |  |  |
|-------------------------------|-------------|-------------|--|--|--|--|
| End Mount                     | Pan<br>Head | Hex<br>Head |  |  |  |  |
| 2"                            | #10         | $\ge$       |  |  |  |  |
| 4"                            | #12         | #12         |  |  |  |  |
| 6"                            | #12         | #12         |  |  |  |  |
| 8"                            | #12         | #12         |  |  |  |  |
| 4" HD                         | #14         | #14         |  |  |  |  |
| 6" HD                         | #14         | #14         |  |  |  |  |
| 8" HD                         | #14         | #14         |  |  |  |  |

#### Step 2

Install the End Mounts using Fasteners (by others). Make sure to match the orientation of the End Mounts so the Link & Lock set matches on the top and the bottom. See above for **Fastener Types and sizing for End Mounts**.

▲ TIP: Check the position of the End Mounts once installed to allow a plumb and straight look.

Step 3

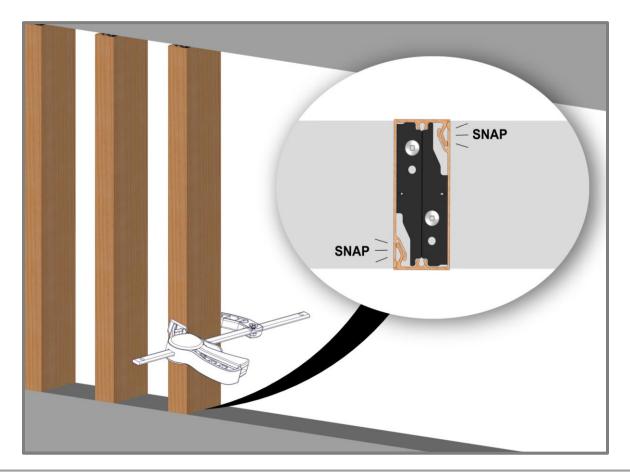

Measure, cut and install Link & Lock Set and snap it into place onto the End Mounts. Use clamps with rubber pads as common practice to securely snap the front "L" onto the back "L".

If necessary, use a rubber mallet or hammer and block to protect the finish.

▲ TIP: When measuring the Link & Lock, make sure to leave a gap (~1/4") for expansion and building movement.

Link & Lock Set

17

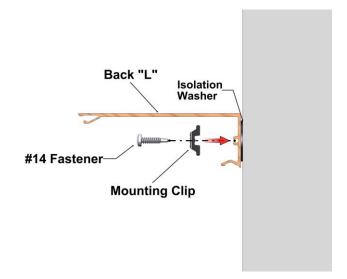

### Cut off Taped/Drilled L&L ends (1/2" each end).

## Link & Lock HD

- Used for greater spans compared to standard Link & Lock
- Available sizes: 4", 6" & 8" (2" depth)
- Uses standard Mounting Clip, Isolation Washer and attachment methods
- Use #14 Fasteners

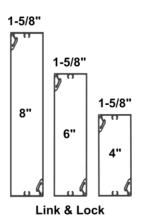

Refer to System Layout and Install steps section for typical install details.

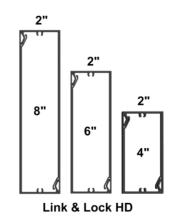

To Compare allowable spans: See Appendix for allowable spans for project specific load. Allowable Span – Tables 3-9

**6" L&L** 6' span max @30PSF 6" L&L HD 12' span max @30PSF **Profile Comparison** 

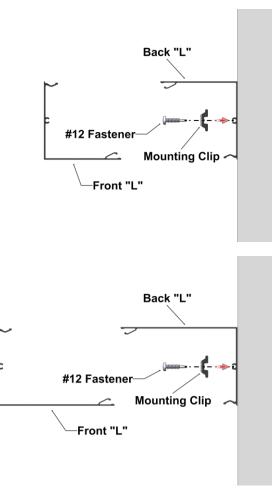

## 4x4 & 4x6 Link & Lock

- Available sizes: 4"x4" & 4"x6"
- Uses standard Mounting Clip and attachment methods with #12 Fasteners

Refer to System Layout and Install steps section for typical install details.

See Appendix for allowable spans for project specific load. Allowable Span – Tables 10-11

## **Appendix**

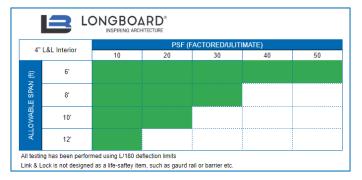

## **Expansion and Contraction Tables**

## Sound Absorption (NRC & SAA)

|   | SOUND ABSORPTION |      |  |  |
|---|------------------|------|--|--|
| LINEAR METAL CEILINGS:                          | NRC              | SAA  |  |  |
| 6" LINK & LOCK BAFFLES @ 6" O.C. w. insulation1 | 0.80             | 0.81 |  |  |
| 6" LINK & LOCK BAFFLES @ 6" O.C                 | 0.10             | 0.12 |  |  |

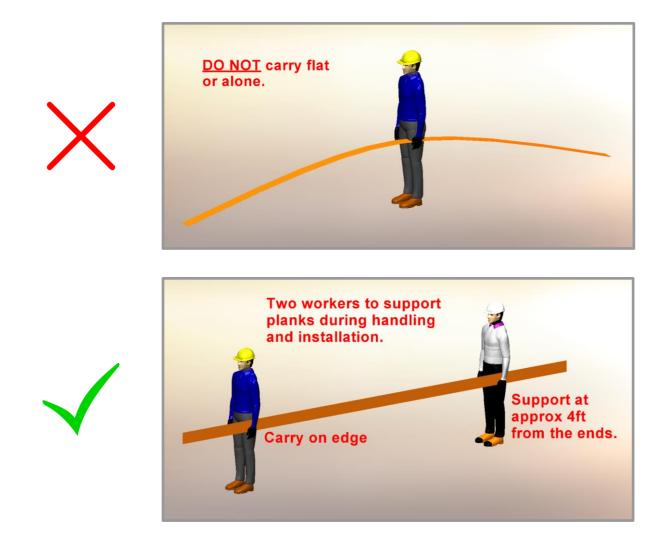

The test reported in this document conformed explicitly with ASTM C423-17: "Standard Test Method for Sound Absorption and Sound Absorption Coefficients by the Reverberation Room Method."

<sup>1</sup>Insulation = 1" Fiberglass backer, 3lbs/ft<sup>3</sup> density

## **Proper Handling of Longboard Products**

To help avoid injury and product damage, Longboard products require proper handling to and from storage areas during installation. When carrying or installing any products it is recommended that they be moved or carried by at least two people with each support point approximately 4ft from the ends. Carrying products without proper support can cause excessive bending which may damage the appearance or finish of the product. Any short cut lengths should also be carried on edge while supporting the material. See below for details.

#### A Delivery, Storage & Handling

- Always inspect the delivery for damage and contact LB ASAP if there are any issues: <u>info@longboardproducts.com</u> or 1-800-604-0343 and include your PO# and any pictures if possible. Longboard is not responsible for the installation of blemished or damaged material.
- Be sure to store the material flat, keep it dry, safe & secure and remain in unopened cartons until ready to be installed.
- Always wear appropriate PPE when handling products.

#### Clause 1

Extruded Aluminum Profile(s) with Powder Coat Finish Longboard expressly warrants that its product line is free from manufacturing defects in material or workmanship.

- 1.1 When product is applied according to Longboard instructions and properly maintained, such product is guaranteed against the following:
- 1.2 Buckling: The product itself will be free of any buckling that is not blocking: the product itseri will be free of any blocking that is not associated with the substrate and/or structure to which the Longboard system is attached. For the purpose of this warranty, buckling shall be defined as warping of the product(s) exceeding one sixteenth of an inch out of plane per linear foot. Corrosion: When installed in normal atmospheric conditions according to Longboard instructions and properly maintained,
- 1.3
- according to Longboard instructions and properly maintained, such product is further guaranteed against rusting and corroding. Subject to the limitations set out in Clause 3 and 4. What we will do: If, during the fifteen (15) year Limited Warantty Period on the powder coating finish, the Product is defective in material or workmanship, Longboard will, in its sole discretion, either repair or replace the defective portion of the Product. What we will do: If, during the fifteen (50) year Limited Waranty Period on the extruded aluminum profiles, the Product is defective in material or workmanchip. Longboard will, in the sole discretion, 1.4
- 1.5 in material or workmanship, Longboard will, in its sole discretion, either repair or replace the defective portion of the Product.
- 1.6
- 1.7
- After the 15th year, this Limited Warranty on the powder coated finish will expire and shall no longer be applicable. After the 50th year, this Limited Warranty on the aluminum extruded profile(s) will expire and shall no longer be applicable. Longboard replacement of the defective Product or reimbursement of this Limited Warranty is the exclusive parachy for the Covered Percen for any defect in materials or 1.8 remedy for the Covered Person for any defect in materials or workmanship. The Company will pay for all reasonable costs including material and labor as it relates to the repair and/or replacement of the defective Product.

Product Finish - AAMA 2604 Performance Specification

- During the first fifteen (15) years of this warranty:
- 2.2
- Checking/Cracking: No visible checking or cracking of the product finish on the building. Chalking Resistance: No chalking of the product finish on the 2.3 building in excess of that represented by No.8 rating based
- building in excess of that represented by No.8 rating based on ASTM D4214. Color Retention: No color change of the product finish on the building greater that 5 (five) CIE Lab  $\triangle$ E units calculated in accordance with ASTM 2244 Section 6.3. Color change shall be measured on the exposed paint surface which has been cleaned of oil, grease, chalk, oxidized film or other contaminants, corresponding values shall be measured on the expression of the control name. 2.4 control panel
- Gloss Retention: Coated surface will exhibit gloss retention of a minimum of 30% of the original. Gloss retention shall be measured on the exposed paint surface which has been cleaned 2.5

of oll, grease, chalk, oxidized film or other contaminants, corresponding values shall be measured on the control panel. Adhesion: Adhesion of product finish when initially applied to test panels and measured by reference to AAMA 2604-02 Clause 7.4.2 will show no removal of the film. 2.6

#### Clause 3

- Warranty Terms and Conditions: 3.1
- The "Warranty Period" for the warranties in Clause 1 shall mean the respective number of years or for as long as the Covered Person commencing on the date of substantial completion named above shall live and own the property on which the material was originally installed. 3.2
- 3.3 Registration of the product is required within ninety (90) days from substantial completion for the warranty to be in effect. This warranty is valid for the original owner and one other subsequent owner of the structure where the product(s) have been installed
- Normal atmospheric conditions exclude corrosive or aggressive atmospheres such as those contaminated with 3.4 chemical fumes or other corrosive elements. The product finish is not meant for marine use on boats, ships or offshore platforms. The product finish warranties as outlined in Clause 2 shall
- 3.5 include coverage of the finish as it relates to the impact effects from hail and woodpecker birds. Under no circumstance shall Longboard's liability under this limited
- 3.6 warranty exceed 2.5 times the total corresponding Longboard material cost (excluding sales tax, labor and installation related costs) as noted on the original purchase invoice and paid by the Buver for the specific project.
