

# TONGUE & GROOVE

## CLADDING SYSTEM

### TYPICAL ISOMETRIC

### PROFILES

V-Groove: 2-1/2", 4", 6"  
 Smooth: 6"  
 Channel: 6"  
 Standard Lengths: 24', 2-1/2"(12")  
 96 SQ FT/box

### COMPONENTS - Standard Lengths: 12'

**Traditional:** Starter Strip, Back-to-Back Starter Strip, 2" Corner Set, 1-3/8" Two Piece J-Track, 1-3/8" Termination Set, Compression Joint (24'), 1-1/2" Flat Reveal Set, 1-1/2" U-Reveal Set, 1-1/2" T&G U-Reveal, 2" Offset Flat Reveal

**Craftsman:** 7/8" J-Track, 3/4" Inside Corner, 1" Outside Corner, 3/4" U-Reveal Set, 3/4" T&G U-Reveal

**Precision:** 5/8" Starter J-Track, 3/16" Outside Corner, 5/8" J-Track, 5/8" Two Piece J-Track, 5/8" Termination Set, 1/2" Flat Reveal, 1/2" T&G Flat Reveal

T&G\_IS\_RG\_V8

### FINISHES

Woodgrains, solid color, naturally aged metal, custom solid color matching (additional lead times apply)

### ATTACHMENT

Planks: Quick-screen clips w. #10 Pan Head screws\* @ 32" o.c. (standard).  
 • Quick-screen Clips: Included in order for 32" o.c. spacings, purchase extra for 16" o.c. spacings. For purchase (extra): 100 pcs/Bag, 1500 pcs/Box  
 Trims: Hard fasten w. #10 Pan Head screws\* @ 16" o.c. \*Screws not included.

### BIM & CAD

RVT & DWG files available, see website for details

### LEAD TIME

Most Popular Finishes  
 -ready to ship within 1 week  
 Additional Finishes  
 -ready to ship within 14 weeks

## Material Specifications

### Finishes

- Longboard Products are available in a wide range of powder coated finishes.
- Custom solid colors are available upon request.
- Longboard woodgrains have a repeat pattern, shipped in sets mated back-to-back in each box. Install these as they come out of the box, as an A&B pattern staggering each plank approx. 1-2' (305-610mm) from the previous plank to achieve a random pattern aesthetic. It is recommended to create an onsite mock-up to produce a suitable pattern.
- Longboard Products are not recommended for use on marine applications in direct contact with salt water.

Longboard extruded products are produced 1" (25mm) oversized, as one end is drilled for the coating process, and both ends have 1/2" (12mm) of masking tape (woodgrains only) which must be cut off for best results. Longboard Cladding is to be installed outboard of a weather resistant barrier, including all flashings, following code, and building requirements.

### Material Ordering & Delivery

|              |   |
|--------------|---|
| • Packaging: | Planks are sold in box quantities:<br>6" Planks: 96 SQ FT/Box (8/24's, 192 LF) w. 90pcs Quick-Screen Clips included<br>4" V-Groove: 96 SQ FT/Box (12/24's, 288 LF) w. 144 Quick-Screen Clips included<br>2 1/2" V-Groove: 20 SQ FT/Box (8/12's, 96 LF) w. 45 Quick-Screen Clips included<br>Trim Components are sold individually by the 12' (3.7m) length.                                   |
| • Shipping:  | Most Popular Finishes -ready to ship within 1 week<br>Additional Finishes -ready to ship within 14 weeks<br>Delivered on 24' (7.3m) long skids weighing up to 2000 lbs. A mechanical lift with forks is required on site to receive the order.  |
| • QC:        | Always inspect the delivery for damage and contact LB ASAP if there are any issues: <a href="mailto:info@longboardproducts.com">info@longboardproducts.com</a> or 1-800-604-0343 and include your PO# and any pictures if possible. Mark the delivery receipt as "damaged" and accept the delivery as-is. Longboard is not responsible for the installation of blemished or damaged material. |

### Storage & Handling

Be sure to store the material flat, keep it dry, safe & secure and remain in unopened cartons until ready to be installed. **See Appendix for proper handling and care instructions.**

### Cleaning Recommendations

- Initial and periodic cleaning for best looking product
- Basic methods use a combination of moderate water pressure, soft sponge/brush and a mild detergent (Safe for your hands, safe for the product)

⚠ NEVER use aggressive acid or alkaline cleaners on Longboard finishes. Do not use cleaners containing Trisodium Phosphate, Phosphoric Acid, Hydrochloric Acid, Hydrofluoric Acid, Fluorides, or any other compound that is known to react with metal.

**\*See Cleaning Guide for full requirements & cleaning schedule:**  
[longboardproducts.com/resources/care-maintenance.com](https://longboardproducts.com/resources/care-maintenance.com)

### Warranty

Upon substantial completion of the project, register for warranty online here: [longboardproducts.com/warranty](https://longboardproducts.com/warranty)

⚠ Registration is required for the warranty to be in effect.

# Graffiti Removal

**Standard Woodgrain**  
 Use Standard soap & water only

**D2000 Solid Color**

|                         | Prosoco Cleaner                     | MEK Solvent                         |

## Tools/Cutting/Fastening

### Tools

Commonly used tools for T&G Cladding install.

|   |   |  |   |
|---|---|--|---|
|  |  |  |            |
| Table Saw with Carbide Metal Blade Non-ferrous 60-80T (for cutting aluminum)      | Miter Saw with Carbide Metal Blade Non-ferrous 60-80T (for cutting aluminum)      | Cordless Drill with clutch   | Jig Saw (for protrusions)   |
|  |  |  |            |
| Rubber Mallet (or Hammer)   | Level   | Hole Saw (for lighting fixtures)   | #10 Pan Head Screws (by others)<br><small>*Length, thread and point to suit substrate</small> |

### Cutting

⚠ Always be sure to wear appropriate PPE: eye & hearing protection.

Cut planks using a Miter Saw and Table Saw, always allowing for expansion & contraction. Trim the taped/drilled ends of all stock length material by at least **1/2" (12mm) each end** and discard.

⚠ DO NOT Install Planks or Trims without trimming the ends.

## Fastening

⚠ Always consult the project engineer, architect or authority having jurisdiction to understand the project specific fastening requirements.

Typical spacing:

-using **#10 Fasteners** (by others)

Trim components including Starter Strip

- **16" (406mm) O.C.**

Planks

Standard wind loads

- **32" (813mm) O.C.**  
(Quick-Screen Clips included with order for this spacing)

Higher wind loads

- **16" (406mm) O.C.**  
(Add extra Quick-Screen Clips to order)

See **Appendix for fastening specs:**

**Fastening to Structure - Table 3**

**Fastening to Sheathing Tables 4-6**

## Framing/Furring requirements

Always consult the local building authority and follow local building code requirements.

When attaching to **Hitch Cladding attachment System** refer to Hitch Install Guide for requirements.

See **Appendix for framing/furring/sheathing specs: Tables 3-6**

## Fastener types

### RECOMMENDED

#### Pan-Head

\*Length, thread and point to suit substrate

### CORRECT

### DO NOT USE

#### Flat-Head

#### Oval-Head

Countersunk Head

### INCORRECT

Fastening to Structure  
(see Table 3 for specs)

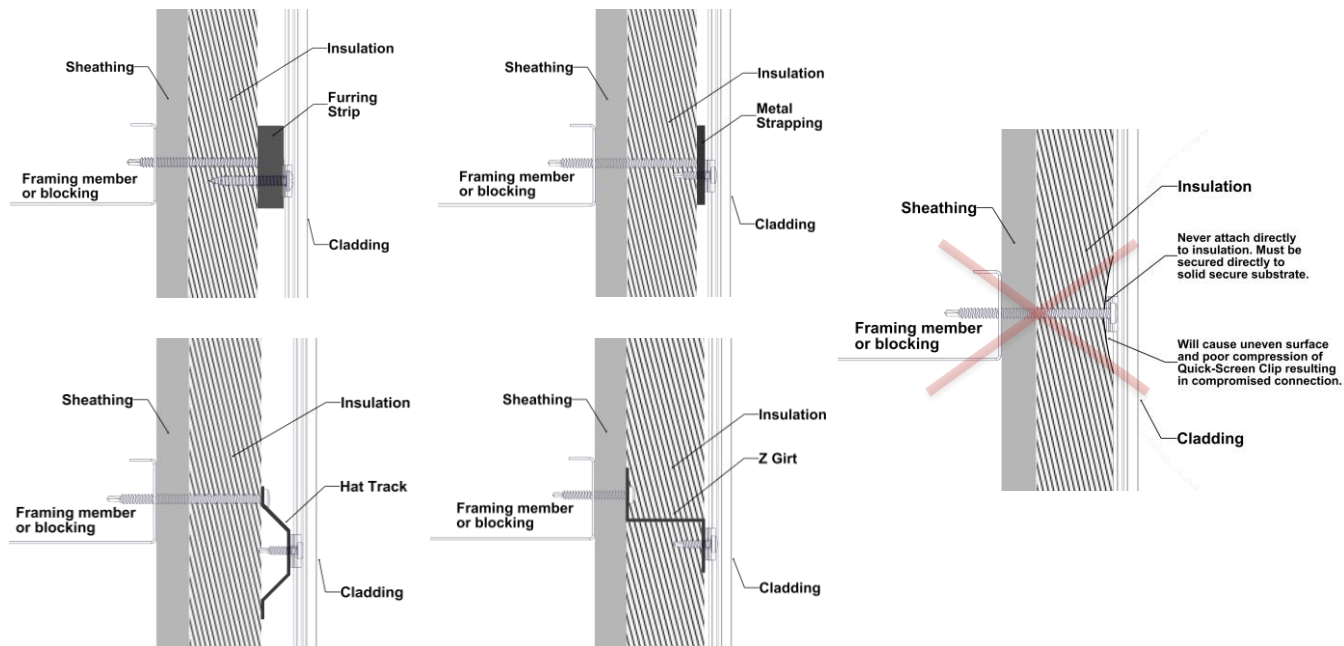

Fastening to Sheathing  
(see Tables 4-6 for specs)

## Fastening options onto exterior insulation or existing materials

\*Never direct to insulation. Must be secured directly to solid secure substrate.

## Fastening option for Drip Edge condition

Note: For Drip Edge condition, Starter Strip requires two anchors at each fastener location (One with Quick Screen Clip and one at top-point sotted hole)

## Expansion & Contraction

While selecting component and layout options, the project design team needs to calculate their expansion and contraction amounts. **See: Appendix for tables of expansion/contraction calculations per foot/meter.** Planks & components expand & contract 1/4" (6mm) over 24' (7.3m), measured over a 30°C (54°F) temperature range. Due to this range of movement, the following expansion components should be installed. See pages 26 & 27.

### Horizontal Install

### Vertical Install

When using expansion components, each plank must terminate into a minimum of one (1) component.

**▲ TIP:** To achieve expansion/contraction allowance, it is best practice to measure & mark for the adjustment of planks.

## System Install

### Perimeter and field area limitations

- Measure and layout your wall area to consider plank & component alignment with fixtures, penetrations, and adjacent walls, for desired appearance. Consider using butt-joints along runs to minimize waste. Apply the same methodology for vertical installations.
- Longboard system typical dimensions:
 

|                                     |   |
|-------------------------------------|---|
| Planks width                        | - 2 1/2" (64mm), 4" (102mm), 6" (152mm) |
| Perforated Planks width             | - 2 1/2" (64mm), 6" (152mm)             |
| Planks and Quick-Screen Clips depth | - 9/16" (14mm)                          |
| Trim Components depth               | - 5/8" (15mm)                           |

Seamless runs up to 24' length planks (no butt-joints)

Runs up to 40' length with staggered butt-joints

Runs greater than 40' length, use a Reveal set to divide field area

## Component Layout

### **A** **Corner Set 2", Outside Corner 1", Inside Corner 3/4"**

**Location:** Inside & outside corners of the installation area.  
**Details:** Corner Set 2" recommended for vertical cladding installs.

### **B** **J-Track (5/8", 7/8"), Two Piece J-Track (5/8", 7/8", 1-3/8")**

**Location:** Perpendicular to Planks (eg: sides of windows and doors), along gable end walls, other angled conditions, window/door headers and other penetrations.  
**Details:** Notch the flange at the ends where they meet corner components.

### **C** **Starter Strip, Starter J-Track 5/8", Back-to-Back Starter Strip**

**Location:** Where starting with a full width Plank, typically along the bottom of the install for horizontal Planks.  
**Details:** Alternatively, **Back-to-Back Starter Strip** can be used for vertical installs at the center of each cladding area for equal width ends.

### **D** **Flat Reveal Set 1-1/2", U-Reveal Set 1-1/2"**

**Location:** Perpendicular to Planks, used to set plank widths.  
**Details:** Two-piece component (cap & base). Precision Flat Reveal (one piece) 6' 8" max span of planks

### **E** **Compression Joint 1-3/8"**

**Location:** Parallel to Planks at floor elevations, (horizontal cladding).  
**Details:** Used for expansion/contraction and settling/building movement at floor elevations.

### **F** **Termination Set (5/8", 7/8", 1-3/8")**

**Location:** Parallel to Planks along top of wall, underside of windows (horizontal cladding only), sides of windows/doors (vertical cladding only) and other penetrations.  
**Details:** Install base only to start and end cap once planks are installed.

### **G** **Offset Flat Reveal 2"**

**Location:** Perpendicular to Planks at floor elevations, (vertical cladding). For pre-fab wall construction, bridging the gap between adjacent wall panels.  
**Details:** Used for expansion/contraction and settling/building movement at floor elevations.

## Install Steps - Horizontal cladding

### Step 1 – Corners

Install inside and outside corner bases or Craftsman inside and outside corners fastening every 16" O.C. with #10 Pan Head Screws. Corners typically extend from top to bottom of the area of application.

⚠ Check that components are level/plumb, flat and straight for best results.

### Step 2 – J-Track

Install J-Track or Two-Piece J-Track around windows and doors and at the edge of walls, fastening every 16" O.C. with #10 Pan Head Screws. Trims can be mitered for a clean corner look.

### Step 3 – Starter Strip

Install the Starter Strip or Starter J-Track along the bottom of the wall(s), fastening every 16" O.C. max with #10 Pan Head Screws.

Fasten the Starter Strip at the Quick Screen Clip & the midpoint slot for a solid connection.

See Appendix for project specific wind load requirements.

Trims Fastening  
-Table 3-6

### Step 4 – Flat Reveal

(Only if required, not shown on layout)

Install the Flat Reveal Set (base only) at the desired plank widths, fastening every 16" O.C. with #10 Pan Head Screws.

### PLANK PREPARATION DURING INSTALL

1. **No** Taped/Drilled ends (cut off 1/2" each end).
2. **No** Damage/dents and correct plank sequence per project.
3. **Confirm** allowance for expansion/contraction & confirm trim/caps cover.
4. **Confirm** level substrate, shims might be required for a flat /straight plank install.

### Step 5 – Planks

Place the planks onto the tongue of the Starter Strip, fully engaging the tongue.

It is good practice to check your installation every 2-3 rows for level/plumb and flat or straight, for best results.

When installing Planks, ensure there is sufficient room for expansion and contraction of each Plank, also confirming component caps will cover.

Leave space for Corner Set Caps to snap into place.

Install Quick Screen Clips every 32" (813mm) O.C. max spacing. Hard fasten only one point at the center of each plank, except where butt-joints are used. Shim Quick Screen Clips where needed to correct any substrate inconsistencies.

**Note:** Quick Screen Clips are included with the order for 32" O.C. spacing. If spacings of 16" O.C. are required for high wind load areas extra clips will need to be ordered.

See **Appendix** for project specific wind load requirements.

#### Plank Fastening - Wind Load Tables 3-6

Install planks as needed. Where anchoring the planks securely can only be achieved over component flanges; split the Quick Screen Clip and use one piece on the front. This will maintain each plank's ability to expand and contract.

### Step 6 – Termination Set

Install Termination Set (base only), fastening every 16" O.C.

Where terminating cut planks, provide a positive stop approximately every 16" (406mm).

### Step 7 – Last Row of Planks

Rip the last Plank, cutting it to width to suit the installation area(s). Install edge plank with a 1/4" gap and screw to lock the Plank into place.

Skip to Page 22 for Finishing Steps.

## Install Steps - Vertical Cladding

### Step 1 – Corners

Install inside and outside corner bases, fastening every 16" O.C. with #10 Pan Head Screws. Corners typically extend from top to bottom of the area of application.

⚠ Check that components are level/plumb, flat and straight for best results.

### Step 2 – J-Track

Install J-Track or Two-Piece J-Track around windows and doors and at the top & bottom of walls, fastening every 16" O.C. with #10 Pan Head Screws. Trims can be mitered for a clean corner look.

### Step 3 – Back-to-Back Starter

Install the Back-to-Back Starter Strip at the center of the wall area to achieve equal width ends. Fasten both sides every 16" O.C. max with #10 Pan Head Screws.

⚠ The Back-to-Back Starter should be secured with a Quick-Screen Clip on both sides of the component.

Alternately, the Starter Strip can be used and installed at the corner of the wall(s) over the Corner Set base and the Starter J-Track used at the edge of the walls.

### Appendix for project specific wind load requirements. Trims Fastening -Table 3-6

Step 4 –Flat Reveal or Offset Flat Reveal (2")  
(Only if required, not shown on layout)

Install the Flat Reveal Set (base only) at the desired plank widths, fastening every 16" O.C. with #10 Pan Head Screws.

## PLANK PREPARATION DURING INSTALL

1. **No Taped/Drilled ends** (cut off 1/2" each end).
2. **No Damage/dents** and correct plank sequence per project.
3. **Confirm** allowance for expansion/contraction & confirm trim/caps cover.
4. **Confirm** level substrate, shims might be required for a flat /straight plank install.

### Step 5 – Planks

Place the planks into the groove of the Starter Strip, engaging the tongue. It is good practice to check your installation every 2-3 rows for level/plumb and flat or straight, for best results.

Ensure there is sufficient room for expansion and contraction of each Plank, also confirming component caps will cover.

Leave space for Corner Set Caps to snap into place.

Install Quick Screen Clips every 32" (813mm) O.C. max spacing. Hard fasten only one point at the center of each plank, except where butt-joint are used. Shim Quick Screen Clips where needed to correct any substrate inconsistencies.

**Note:** Quick Screen Clips are included with the order for 32" O.C. spacing. If spacings of 16" O.C. are required for high wind load areas extra clips will need to be ordered.

See **Appendix** for project specific wind load requirements.

**Plank Fastening**  
- Wind Load Tables 3-6

Install planks as needed. Where anchoring the planks securely can only be achieved over component flanges; split the Quick Screen Clip and use one piece on the front. This will maintain each plank's ability to expand and contract.

## Step 6 & 7

### Step 6 – Termination Set

Install Termination Set (base only), fastening every 16" O.C.

Where terminating cut planks, provide a positive stop approximately every 16" (406mm).

#### Termination Set base

#### #10 Pan Head Screw

### Step 7 – Last Row of Planks

Rip the last Plank, cutting it to width to suit the installation area(s). Install edge plank with a 1/4" gap and screw to lock the Plank into place.

See next page for Finishing Steps.

**Finishing Steps** - Once planks are installed, finish off the perimeter trims with caps from two-piece sets.

### Component Caps

**Location:** Installed onto the base of the two-piece sets.

**Details:** If required, use a rubber mallet or hammer and block to protect the finish during this process.  
Confirm Caps cover Planks with sufficient room for expansion and contraction.

## Details

### Single Butt-Joints

- Consider using butt-joints along runs to minimize waste.
- When installing staggered butt-joints, use the Butt-Joint Fastening Kit to ensure joints do not open up (See Detail A & B).  
Fasteners should be placed at the uppermost location of the plank flange, to not interfere with the next plank engaging the tongue and groove properly. At the butt-joint, fasteners should be anchored into the Butt-Joint backer plate.  
(See Detail C)
- Rivets can be used for single butt-joints, however clearance of the rivets and room for movement is required.
- On exposed cuts such as butt-joints, trim ends or similar, use touch-up paint pens (purchased separately) to finish the ends of the two (2) planks at the butt-joint.
- DO NOT hard-fasten a plank to a component trim, as this will restrict its ability to expand & contract into the component.
- If no butt joints along the length, it is good practice to hard-fasten each plank directly through the flange near the center, to keep the planks from migrating.
- DO NOT hard-fasten more than one (1) location per plank.
- Hard fasten at the butt-joint or the center of each plank run.

**Detail A -Horizontal Cladding**

**Detail B -Vertical Cladding**

**Detail C -Backer Plate (Hard Fastened)**

## Multiple Floating Butt-Joints

- ⚠ When installing staggered multiple floating butt-joints, use the Butt-Joint Fastening Kit to ensure joints do not open up. Rivets should be placed at the center of the plank flange, to not interfere with the next plank engaging the tongue and groove properly. **(See Detail D)**
- MUST HAVE furring strips or girts to allow room for movement.
- Recommended to be installed between furring strips or framing members to avoid contact which would restrict movement. **(See Detail E)**
- On exposed cuts such as butt-joints, trim ends or similar, use touch-up paint pens (purchased separately) to finish the ends of the two (2) planks at the butt-joint.
- DO NOT hard-fasten a plank to a component trim, as this will restrict its ability to expand & contract into the component.
- DO NOT hard-fasten more than one (1) location per multiple plank run.
- Hard fasten near the center of the multiple plank run.

Detail D -Floating Butt-Joint

Detail E -Butt-Joint Movement

## Floor elevation

### Compression Joint

|           |  |
|-----------|--|
| Type:     | Compression Joint, Termination set/Starter J-Track, J-Track back-to-back.        |
| Location: | Typically, at every floor elevation and where through-wall flashing is required. |
| Details:  | Note the orientation of planks for through-wall flashing install.                |

### Through-wall Flashing

Horizontal Install

Vertical Install

## Expansion reveals

|           |  |
|-----------|--|
| Type:     | Traditional Flat Reveal Set/Traditional U-Reveal Set/Precision Flat Reveal.  |
| Location: | Typically for wall areas greater than 24' (7.3m) long (no butt-joints) or 40' (12.2m) long (With staggered butt-joints). See <b>Expansion and contraction</b> for details. |
| Details:  | Install base only to start and end cap once planks are installed.  |

\*\*For Concrete and Masonry/CMU; Furring Strips are recommended, where possible

GENERAL NOTES:

1. Adequacy of the structural stud framing (wood and/or metal) and concrete/masonry as a main wind force resisting system capable of withstanding and transferring applied product loads to the foundation is the responsibility of the engineer or architect of record for the project of installation.

2. Substrate shall be designed and anchored to properly transfer all loads to the structure buck design and installation is the responsibility of the engineer or architect of record for the project of installation.

3. The installation details described herein are generic and may not reflect actual conditions for a specific site. If site conditions cause installation to deviate from the requirements detailed herein, a licensed engineer or architect shall prepare site specific documents for use with this document.

4. An unfactored dead load of 1.5 psf was assumed for the cladding.

INSTALLATION NOTES:

1. One (1) installation anchor is required at each Quick-Screen Clip location. Minimum of two (2) anchors per plank.

2. Spacing is from clip/fastener center to center.

3. The number of installation anchors per the table is the minimum number of anchors to be used for product installation.

4. Install individual installation anchors within a tolerance of +/- 1/2" of the specified spacings. Tolerances are not cumulative from one installation anchor to the next.

5. If fastening to every second stud, the attachment stud shall be staggered between adjacent runs of cladding.

6. Minimum embedment and edge distance exclude wall finishes, including but not limited to wood furrings, stucco, foam, brick veneer, sheathing and siding.

7. Installation anchors and associated hardware must be made of corrosion resistant material or have a corrosion resistant coating. Common fastener types can be equal or better to a & b listed below:

a. Zinc plated fasteners for moderate climate zones

b. 316 Stainless Steel fasteners for coastal climate zones

8. For CMU grout filled block, do not install installation anchors into mortar joints. Edge distance is measured from free edge of block or edge of mortar joint into face shell of block.

9. Installation anchors shall be installed in accordance with anchor manufacturer's installation instructions, and anchors shall not be used in substrates with strengths less than the minimum strength specified by the anchor manufacturer.

## Proper Handling of Longboard Products

To help avoid injury and product damage, Longboard products require proper handling to and from storage areas during installation. When carrying or installing any products it is recommended that they be moved or carried by at least two people with each support point approximately 4ft from the ends. **Carrying products without proper support can cause excessive bending which may damage the appearance or finish of the product.** Any short cut lengths should also be carried on edge while supporting the material. See below for details.

### ⚠️ Delivery, Storage & Handling ⚠️

- Always inspect the delivery for damage and contact LB ASAP if there are any issues: [info@longboardproducts.com](mailto:info@longboardproducts.com) or 1-800-604-0343 and include your PO# and any pictures if possible. Longboard is not responsible for the installation of blemished or damaged material.
- Be sure to store the material flat, keep it dry, safe & secure and remain in unopened cartons until ready to be installed.
- Always wear appropriate PPE when handling products.

# Finish Options

## Achieve your vision.

Whether creating a space that offers the warmth and appearance of Woodgrains, or the modern industrialized look of Naturally Aged Metals, we have a finish option for you.

Require a custom finish or color? Our experienced color-matching team can make it a reality!

Contact us to confirm lead times for orders greater than 15k sq.ft in the Most Popular Finishes category.

### Longboard Finish Classification

**Type:** Woodgrain / Solid / Metallic /

Speckle / Naturally Aged Metal

**Surface:** Smooth / Textured

**Sheen:** Matte / Satin / Glossy

**Performance:** AAMA 2604 / AAMA 2605

**Finish Warranty:** 15 Year / 20 Year

Click / Scan the QR code to check our latest lead times and explore available options!

## Woodgrains

Longboard's woodgrain finishes have a slight texture with matte sheen.

## Solid & Specialty

## Speckle

## Naturally Aged Metals

Print, Screens, and our pictures do not accurately reflect aspects of our finishes – textures, sheen, woodgrain hues, etc. Always order a physical sample before purchase! Our Color Bars swatches and samples will provide an accurate representation.

If a custom finish is required, we will work with our industry leading coating suppliers to develop a custom finish solution. All finishes are rigorously tested for corrosion and weathering resistance to ensure that it will stand up and deliver superior performance in the built environment.

We perform accelerated weathering testing in our onsite laboratory and work closely with coating suppliers to review weathering results of finishes undergoing natural Florida exposure testing. Our disciplined approach to powder coating, quality and process control distinguishes it as industry leading product manufacturer and ensures that its premium products stay looking beautiful for many, many years.

## 15 Year Non-Prorated Powder Coating Finish - 50 Year Non-Prorated Extruded Aluminum Profiles [ Limited Warranty ]

Warranty granted to (building owner):

Longboard Architectural Products Inc. ("Longboard," "The Company") products as identified by the Product Codes listed will conform to the standards set out in Clause 1 and Clause 2 of this Warranty, subject to the terms and conditions set out in Clause 3 and 4 of this Warranty.

This Pinnacle Warranty is only valid for applications within Canada and USA. All applications outside of Canada and USA are required to contact Longboard for assistance.

### Clause 1

Extruded Aluminum Profile(s) with Powder Coat Finish Longboard expressly warrants that its product line is free from manufacturing defects in material or workmanship.

- 1.1 When product is applied according to Longboard instructions and properly maintained, such product is guaranteed against the following:
- 1.2 Buckling: The product itself will be free of any buckling that is not associated with the substrate and/or structure to which the Longboard system is attached. For the purpose of this warranty, buckling shall be defined as warping of the product(s) exceeding one sixteenth of an inch out of plane per linear foot.
- 1.3 Corrosion: When installed in normal atmospheric conditions according to Longboard instructions and properly maintained, such product is further guaranteed against rusting and corroding. Subject to the limitations set out in Clause 3 and 4.
- 1.4 What we will do: If, during the fifteen (15) year Limited Warranty Period on the powder coating finish, the Product is defective in material or workmanship, Longboard will, in its sole discretion, either repair or replace the defective portion of the Product.
- 1.5 What we will do: If, during the fifty (50) year Limited Warranty Period on the extruded aluminum profiles, the Product is defective in material or workmanship, Longboard will, in its sole discretion, either repair or replace the defective portion of the Product.
- 1.6 After the 15th year, this Limited Warranty on the powder coated finish will expire and shall no longer be applicable.
- 1.7 After the 50th year, this Limited Warranty on the aluminum extruded profile(s) will expire and shall no longer be applicable.
- 1.8 Longboard replacement of the defective Product or reimbursement of this Limited Warranty is the exclusive remedy for the Covered Person for any defect in materials or workmanship. The Company will pay for all reasonable costs including material and labor as it relates to the repair and/or replacement of the defective Product.

### Clause 2

Product Finish - AAMA 2604 Performance Specification

- 2.1 During the first fifteen (15) years of this warranty:
- 2.2 Checking/Cracking: No visible checking or cracking of the product finish on the building.
- 2.3 Chalking Resistance: No chalking of the product finish on the building in excess of that represented by No.8 rating based on ASTM D4214.
- 2.4 Color Retention: No color change of the product finish on the building greater than 5 (five) CIE Lab $\Delta$ E units calculated in accordance with ASTM 2244 Section 6.3. Color change shall be measured on the exposed paint surface which has been cleaned of oil, grease, chalk, oxidized film or other contaminants, corresponding values shall be measured on the control panel.
- 2.5 Gloss Retention: Coated surface will exhibit gloss retention of a minimum of 30% of the original. Gloss retention shall be measured on the exposed paint surface which has been cleaned

- 2.6 of oil, grease, chalk, oxidized film or other contaminants, corresponding values shall be measured on the control panel.
- Adhesion: Adhesion of product finish when initially applied to test panels and measured by reference to AAMA 2604-02 Clause 7.4.2 will show no removal of the film.

### Clause 3

- 3.1 Warranty Terms and Conditions:
- 3.2 The "Warranty Period" for the warranties in Clause 1 shall mean the respective number of years or for as long as the Covered Person commencing on the date of substantial completion named above shall live and own the property on which the material was originally installed.
- 3.3 Registration of the product is required within ninety (90) days from substantial completion for the warranty to be in effect. This warranty is valid for the original owner and one other subsequent owner of the structure where the product(s) have been installed.
- 3.4 Normal atmospheric conditions exclude corrosive or aggressive atmospheres such as those contaminated with chemical fumes or other corrosive elements. The product finish is not meant for marine use on boats, ships or offshore platforms.
- 3.5 The product finish warranties as outlined in Clause 2 shall include coverage of the finish as it relates to the impact effects from hail and woodpecker birds.
- 3.6 Under no circumstance shall Longboard's liability under this limited warranty exceed 2.5 times the total corresponding Longboard material cost (excluding sales tax, labor and installation related costs) as noted on the original purchase invoice and paid by the Buyer for the specific project.

### Clause 4

- 4.1 This warranty will not extend or cover:
- 4.2 Damages to the coated metal caused by handling, shipping, processing and/or installation; or
- 4.3 Damages to the coated metal caused by scratching or abrading after installation; or
- 4.4 Damages to the coated metal as a result of standing water in horizontal installations.
- 4.5 The warranty will not be applicable to damage or failure, which is caused by acts of God, falling objects, external forces, explosions, fire, riots, civil commotion's, acts of war, or other such similar or dissimilar occurrences beyond The Company's control.
- 4.6 Customer shall make available to The Company the dates of the installation of the coated metal, the maintenance records including details of washing and cleaning procedures in compliance with the cleaning requirements as stated in the Required Maintenance section of this warranty. Customers shall demonstrate that the failure of the coated metal was due to a breach of the warranty stated herein.
- 4.7 Claims must be made in writing to Longboard within 30 days of the discovery of a problem and authorization obtained prior to beginning any repair and/or refinishing work.

The claimant must provide proof of coverage. Claims can be made by writing to Longboard at the Product Performance Department. After receiving such notice, The Company must be given a reasonable opportunity to inspect and verify the claim. Longboard exclusive liability under this warranty, or other- wise, will be limited to refinishing and/or repairing, at The Company's sole discretion, the defective powder coated product. The warranty on any refinishing, repaired or replaced coated metal supplied hereunder shall be for the remainder of the warranty period applicable to the originally coated metal. All warranty work will be performed by a company or contractor selected by Longboard. Color variance between refinishing and/or repainted product and original shall not be indicative of a defect.

4.8 This warranty represents the entire agreement between parties in relation to its subject matter and supersedes any previous agreement whether written or oral between the parties in relation to its subject matter. The limited warranties state the entire liability of Longboard with respect to the products covered by them. The Company shall have no liability for any incidental or consequential damages. No person is authorized to make any representation or warranty on behalf of Longboard except as expressly set forth above, and any such statement shall not be binding on The Company. Except as expressly set forth above, Longboard makes no warranty of any kind, express or implied, including, without limitation, any implied warranty of merchantability or fitness for a particular purpose. Warranties shall be the duration of the limited warranty, or such shorter duration as provided under applicable local law. These limited warranties give you specific legal rights, and you may also have other rights which vary from area to area.

4.9 Nothing in this warranty shall be construed as a warranty of the workmanship of any installer or as imposing on Longboard any liability for unsatisfactory performance caused by faulty workmanship in installation.

4.10 It's agreed all parties involved that all claims and disputes relating to this agreement that cannot be settled through negotiation will try in good faith to first settle the dispute by mediation administered by the American Arbitration Association (Construction Industry Mediation Procedures) as a prelude to mandatory binding arbitration. Such binding arbitration is to be conducted and administered by the Construction Industry Arbitration Rules of the American Arbitration Association. Both seller and purchaser agree to share equally in the costs of both mediation and arbitration and that such binding arbitration will be the sole and final remedial action.

4.11 Required Maintenance. Depending on the Project Environment, follow the maintenance schedule as outlined in the Longboard Care & Maintenance Guide. Use a soft sponge or cloth, water and mild detergent, non-abrasive soap with the pH range of 5-9 to clean the powder coated area of dirt, grime and other debris. Pressure washing and the use of harsh detergents or chemicals is not recommended. Include in your maintenance records the following: date, time, specific products used, name of maintenance person and their designation, maintenance company name and general condition of the powder coated finish.

I have read and agree to the terms of the Longboard® Product 15 year powder coated surface and 50 year aluminum extruded profile(s) warranty and acknowledge receipt of a copy of the Warranty Certificate.

**Clause 1**

Extruded Aluminum Profile(s) with Powder Coat Finish Longboard expressly warrants that its product line is free from manufacturing defects in material or workmanship.

- 1.1 When product is applied according to Longboard instructions and properly maintained, such product is guaranteed against the following:
- 1.2 Buckling: The product itself will be free of any buckling that is not associated with the substrate and/or structure to which the Longboard system is attached. For the purpose of this warranty, buckling shall be defined as warping of the product(s) exceeding one sixteenth of an inch out of plane per linear foot.
- 1.3 Corrosion: When installed in normal atmospheric conditions according to Longboard instructions and properly maintained, such product is further guaranteed against rusting and corroding. Subject to the limitations set out in Clause 3 and 4.
- 1.4 What we will do: If, during the twenty (20) year Limited Warranty Period on the powder coating finish, the Product is defective in material or workmanship, Longboard will, in its sole discretion, either repair or replace the defective portion of the Product.
- 1.5 What we will do: If, during the fifty (50) year Limited Warranty Period on the extruded aluminum profiles, the Product is defective in material or workmanship, Longboard will, in its sole discretion, either repair or replace the defective portion of the Product.
- 1.6 After the 20th year, this Limited Warranty on the powder coated finish will expire and shall no longer be applicable.
- 1.7 After the 50th year, this Limited Warranty on the aluminum extruded profile(s) will expire and shall no longer be applicable.
- 1.8 Longboard replacement of the defective Product or reimbursement of this Limited Warranty is the exclusive remedy for the Covered Person for any defect in materials or workmanship. The Company will pay for all reasonable costs including material and labor as it relates to the repair and/or replacement of the defective Product.

**Clause 2**

Product Finish - AAMA 2605 Performance Specification

- 2.1 During the first twenty (20) years of this warranty:
- 2.2 Checking/Cracking: No visible checking or cracking of the product finish on the building.
- 2.3 Chalking Resistance: No chalking of the product finish on the building in excess of that represented by No.8 rating based on ASTM D4214.
- 2.4 Color Retention: No color change of the product finish on the building greater than 5 (five) CIE Lab ΔE units calculated in accordance with ASTM 2244 Section 6.3. Color change shall be measured on the exposed paint surface which has been cleaned of oil, grease, chalk, oxidized film or other contaminants, corresponding values shall be measured on the control panel.
- 2.5 Gloss Retention: Coated surface will exhibit gloss retention of a minimum of 50% of the original. Gloss retention shall be measured on the exposed paint surface which has been cleaned

- 2.6 of oil, grease, chalk, oxidized film or other contaminants, corresponding values shall be measured on the control panel.
- Adhesion: Adhesion of product finish when initially applied to test panels and measured by reference to AAMA 2605-02 Clause 7.4.2 will show no removal of the film.

**Clause 3**

- 3.1 Warranty Terms and Conditions:
- 3.2 The "Warranty Period" for the warranties in Clause 1 shall mean the respective number of years or for as long as the Covered Person commencing on the date of substantial completion named above shall live and own the property on which the material was originally installed.
- 3.3 Registration of the product is required within ninety (90) days from substantial completion for the warranty to be in effect. This warranty is valid for the original owner and one other subsequent owner of the structure where the product(s) have been installed.
- 3.4 Normal atmospheric conditions exclude corrosive or aggressive atmospheres such as those contaminated with chemical fumes or other corrosive elements. The product finish is not meant for marine use on boats, ships or offshore platforms.
- 3.5 The product finish warranties as outlined in Clause 2 shall include coverage of the finish as it relates to the impact effects from hail and woodpecker birds.
- 3.6 Under no circumstance shall Longboard's liability under this limited warranty exceed 2.5 times the total corresponding Longboard material cost (excluding sales tax, labor and installation related costs) as noted on the original purchase invoice and paid by the Buyer for the specific project.

**Clause 4**

- 4.1 This warranty will not extend or cover:
- 4.2 Damages to the coated metal caused by handling, shipping, processing and/or installation; or
- 4.3 Damages to the coated metal caused by scratching or abrading after installation; or
- 4.4 Damages to the coated metal as a result of standing water in horizontal installations.
- 4.5 The warranty will not be applicable to damage or failure, which is caused by acts of God, falling objects, external forces, explosions, fire, riots, civil commotion's, acts of war, or other such similar or dissimilar occurrences beyond The Company's control.
- 4.6 Customer shall make available to The Company the dates of the installation of the coated metal, the maintenance records including details of washing and cleaning procedures in compliance with the cleaning requirements as stated in the Required Maintenance section of this warranty. Customers shall demonstrate that the failure of the coated metal was due to a breach of the warranty stated herein.
- 4.7 Claims must be made in writing to Longboard within 30 days of the discovery of a problem and authorization obtained prior to beginning any repair and/or refinishing work.

- 4.8 The claimant must provide proof of coverage. Claims can be made by writing to Longboard at the Product Performance Department. After receiving such notice, The Company must be given a reasonable opportunity to inspect and verify the claim. Longboard exclusive liability under this warranty, or otherwise, will be limited to refinishing and/or repairing, at The Company's sole discretion, the defective powder coated product. The warranty on any refinishing, repaired or replaced coated metal supplied hereunder shall be for the remainder of the warranty period applicable to the originally coated metal. All warranty work will be performed by a company or contractor selected by Longboard. Color variance between refinishing and/or repainted product and original shall not be indicative of a defect.

- 4.9 This warranty represents the entire agreement between parties in relation to its subject matter and supersedes any previous agreement whether written or oral between the parties in relation to its subject matter. The limited warranties state the entire liability of Longboard with respect to the products covered by them. The Company shall have no liability for any incidental or consequential damages. No person is authorized to make any representation or warranty on behalf of Longboard except as expressly set forth above, and any such statement shall not be binding on The Company. Except as expressly set forth above, Longboard makes no warranty of any kind, express or implied, including, without limitation, any implied warranty of merchantability or fitness for a particular purpose. Warranties shall be the duration of the limited warranty, or such shorter duration as provided under applicable local law. These limited warranties give you specific legal rights, and you may also have other rights which vary from area to area.

- 4.10 Nothing in this warranty shall be construed as a warranty of the workmanship of any installer or as imposing on Longboard any liability for unsatisfactory performance caused by faulty workmanship in installation.

- 4.11 It's agreed all parties involved that all claims and disputes relating to this agreement that cannot be settled through negotiation will try in good faith to first settle the dispute by mediation administered by the American Arbitration Association (Construction Industry Mediation Procedures) as a prelude to mandatory binding arbitration. Such binding arbitration is to be conducted and administered by the Construction Industry Arbitration Rules of the American Arbitration Association. Both seller and purchaser agree to share equally in the costs of both mediation and arbitration and that such binding arbitration will be the sole and final remedial action.

- 4.12 Required Maintenance. Depending on the Project Environment, follow the maintenance schedule as outlined in the Longboard Care & Maintenance Guide. Use a soft sponge or cloth, water and mild detergent, non-abrasive soap with the pH range of 5-9 to clean the powder coated area of dirt, grime and other debris. Pressure washing and the use of harsh detergents or chemicals is not recommended. Include in your maintenance records the following: date, time, specific products used, name of maintenance person and their designation, maintenance company name and general condition of the powder coated finish.

I have read and agree to the terms of the Longboard® Product 20 year powder coated surface and 50 year aluminum extruded profile(s) warranty and acknowledge receipt of a copy of the Warranty Certificate.
