# BROOKFIELD CONFERENCE CENTER

<b>Architect</b>	Kahler Slater
<b>Installer</b>	SRS Roofing & Metal Sheet Inc
<b>Products</b>	Tongue & Groove Planks
<b>Finish</b>	Dark Fir
<b>State</b>	Wisconsin
<b>Country</b>	U.S.A

The Brookfield Conference Center stands as a premier destination for events, business gatherings, and community functions in southeastern Wisconsin.

Featuring Longboard's 6" V-Groove Tongue & Groove planks in Dark Fir, the warm wood-tone aluminum soffit uniquely transitions from an angled line to flat.

The seamless transition from the soffit to the interior ceiling accentuates the natural elegance of the center's contemporary architectural lines.

As a central gathering place for both local residents and visitors, the Brookfield Conference Center plays a vital role in fostering connection, commerce, and culture in the community.

"The Brookfield Conference Center sets the standard for premier meeting space in Southeast Wisconsin... designed with flexibility and sophistication to accommodate events of every size."  
- Nancy Justman, President/CEO

# GOOGLE HEADQUARTERS

Architect	Tryba Architects
Installer	Gen3 Construction
Products	Tongue & Groove Planks
Finish	Light Cherry
State	Colorado
Country	U.S.A

Google's campus in Boulder, Colorado boasts functionality, creativity, connection, and nature in its design. Longboard is integrated into the exterior soffits featuring 4" V-Groove Tongue & Groove planks in Light Cherry to add an inviting dimension of warmth to the building's contemporary design.

# LATIMER LAKE

<b>Architect</b>	Aggregate Design Studio
<b>Installer</b>	Planwork's vision
<b>Products</b>	Tongue & Groove, Link & Lock, Panelboard, Board & Batten and Lap Siding
<b>Finish</b>	Dark National Walnut, Bone White, Imperial Slate & Ultra White
<b>State</b>	British Columbia
<b>Country</b>	Canada

This modern warehouse, retail, and office space showcases an abundance of Longboard's product line. Latimer Lake Logistics Park features Tongue & Groove planks, Link & Lock™, and PanelBoard™ in a variety of finishes to give it a modern and welcoming feel to this industrial logistics hub.

# LAKE MIRROR OFFICES

<b>Architect</b>	The Lunz Group
<b>Installer</b>	Laing Roofing
<b>Products</b>	Tongue & Groove Planks
<b>Finish</b>	Dark Fir
<b>State</b>	Florida
<b>Country</b>	U.S.A

The Lake Mirror Office Building in Lakeland, Florida combines contemporary architecture with a natural aesthetic.

Longboard's 6" Channel planks in Dark Fir are featured as cladding and across expansive soffit overhangs, lending the structure a beautiful rich wood-grain texture that contrasts with the glass and darker metal-toned façade.

These Dark Fir accents enhance visual depth, while the generous overhangs soften the building's modern lines and enhance its street presence.

# ORLANDO MAGIC TRAINING FACILITY

<b>Architect</b>	HOK
<b>Installer</b>	Balfour Beatty
<b>Products</b>	Tongue & Groove and Link & Lock
<b>Finish</b>	Light Cherry
<b>State</b>	Colorado
<b>Country</b>	U.S.A

Designed as a cutting-edge training center for peak performance and player well-being is the Orlando Magic Practice Facility. This refined architectural vision includes Longboard's Link & Lock™ batten system and Tongue & Groove planks in Light Cherry. Strategically placed on the exterior of the building to add texture with a natural finish.

# ALBERNI TOWER

<b>Architect</b>	Kengo Kumi
<b>Installer</b>	Heavy Industries
<b>Products</b>	Link & Lock
<b>Finish</b>	Custom Color
<b>State</b>	British Columbia
<b>Country</b>	Canada

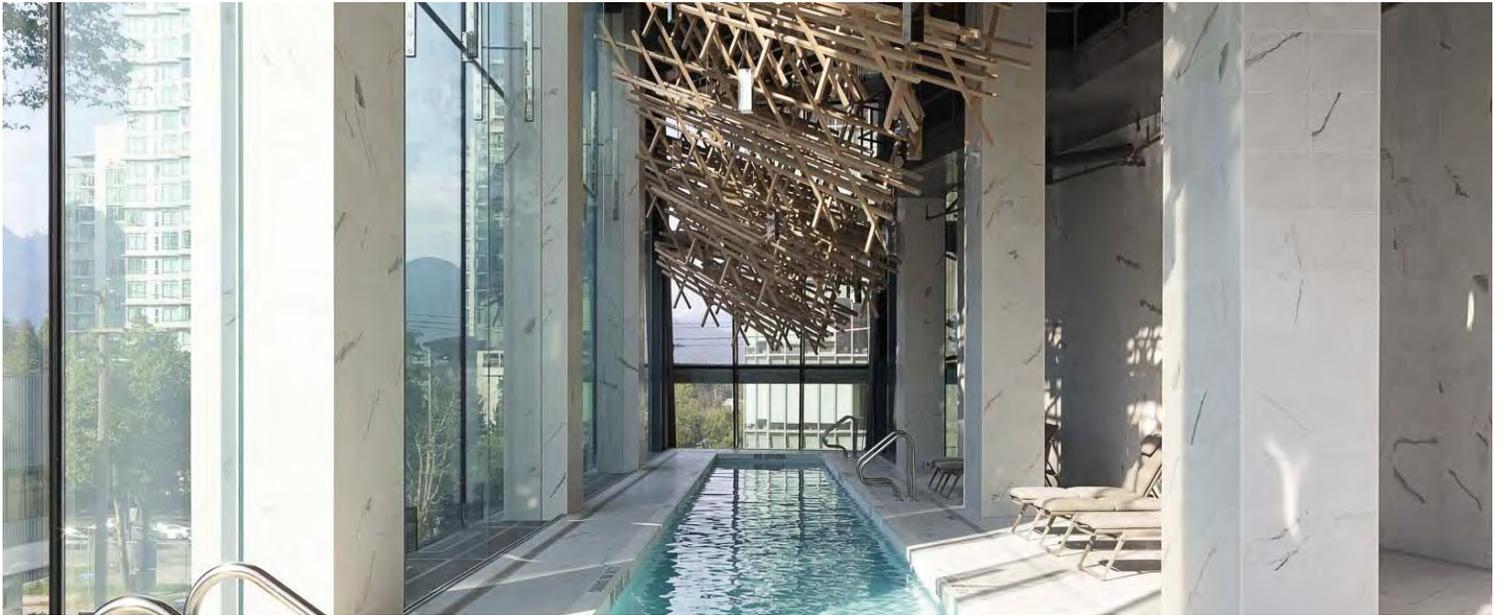

The Alberni Tower in Vancouver's Coal Harbour District embodies a fusion of artistry and modern craftsmanship.

Inside, the space features Longboard's Link & Lock™ batten system in a custom woodgrain finish, installed as interior screens and partitions.

These bespoke aluminum battens create a sculptural rhythm that defines the interior with warmth, precision, and depth.

The breathtaking hanging structure at the base of the tower was created with over 26,000 linear feet of custom Longboard extrusion using a custom woodgrain finish to emulate the look of natural bamboo.

"Kuma-san was inspired to create something that in time, the world will judge as being amongst the most artistic and resolved residential buildings ever built."

# CASA QUERÉTARO

Architect	Design Bridge
Installer	AVA Siding LLC
Products	Tongue & Groove Planks
Finish	Wickr Café, Cream & Cashmere
State	Illinois
Country	U.S.A

Casa Querétaro is a vibrant multifamily housing development located in Chicago, designed to provide high-quality, affordable housing for local families.

The building features Longboard's 4" V-Groove Tongue & Groove planks as exterior cladding, delivering the timeless appeal of wood in a durable, low-maintenance aluminum solution.

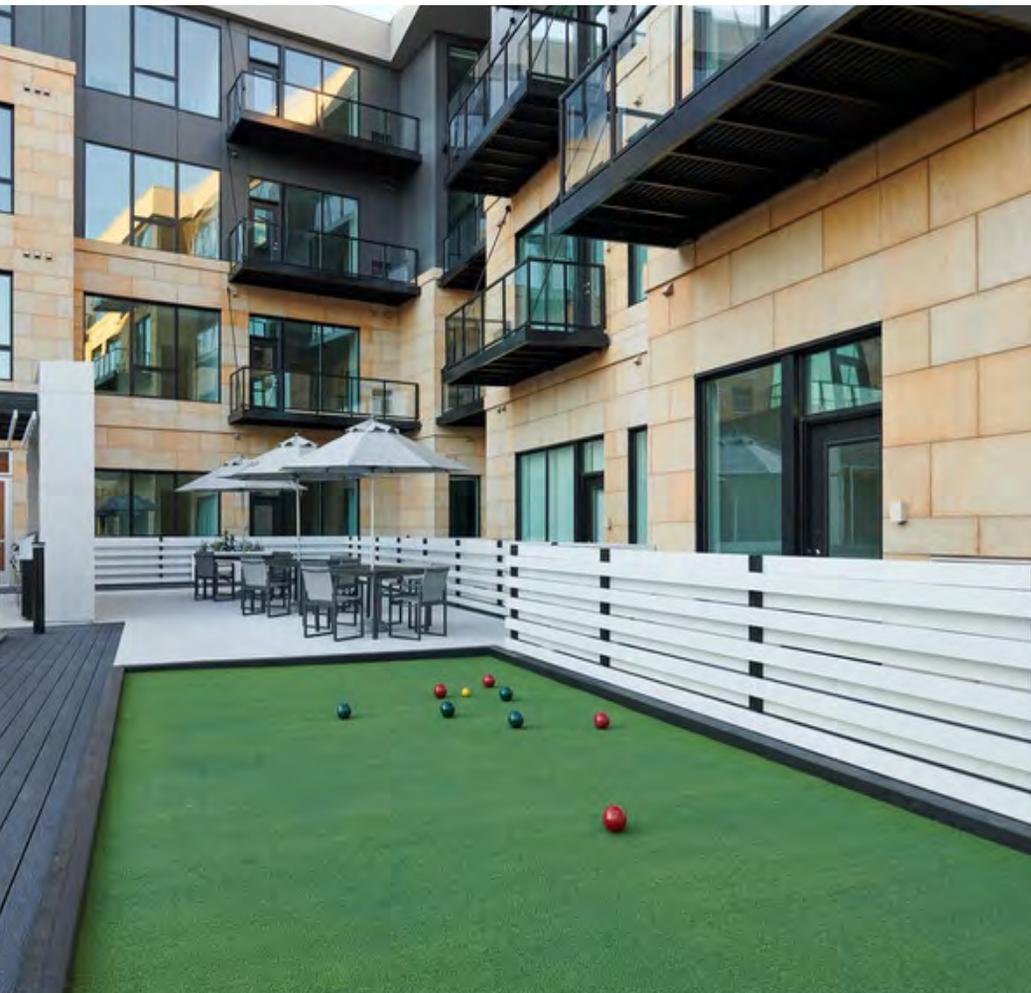

The siding enhances the building's modern design with clean lines and warm texture, contributing to a welcoming, community-focused atmosphere.

# LUXE APARTMENTS

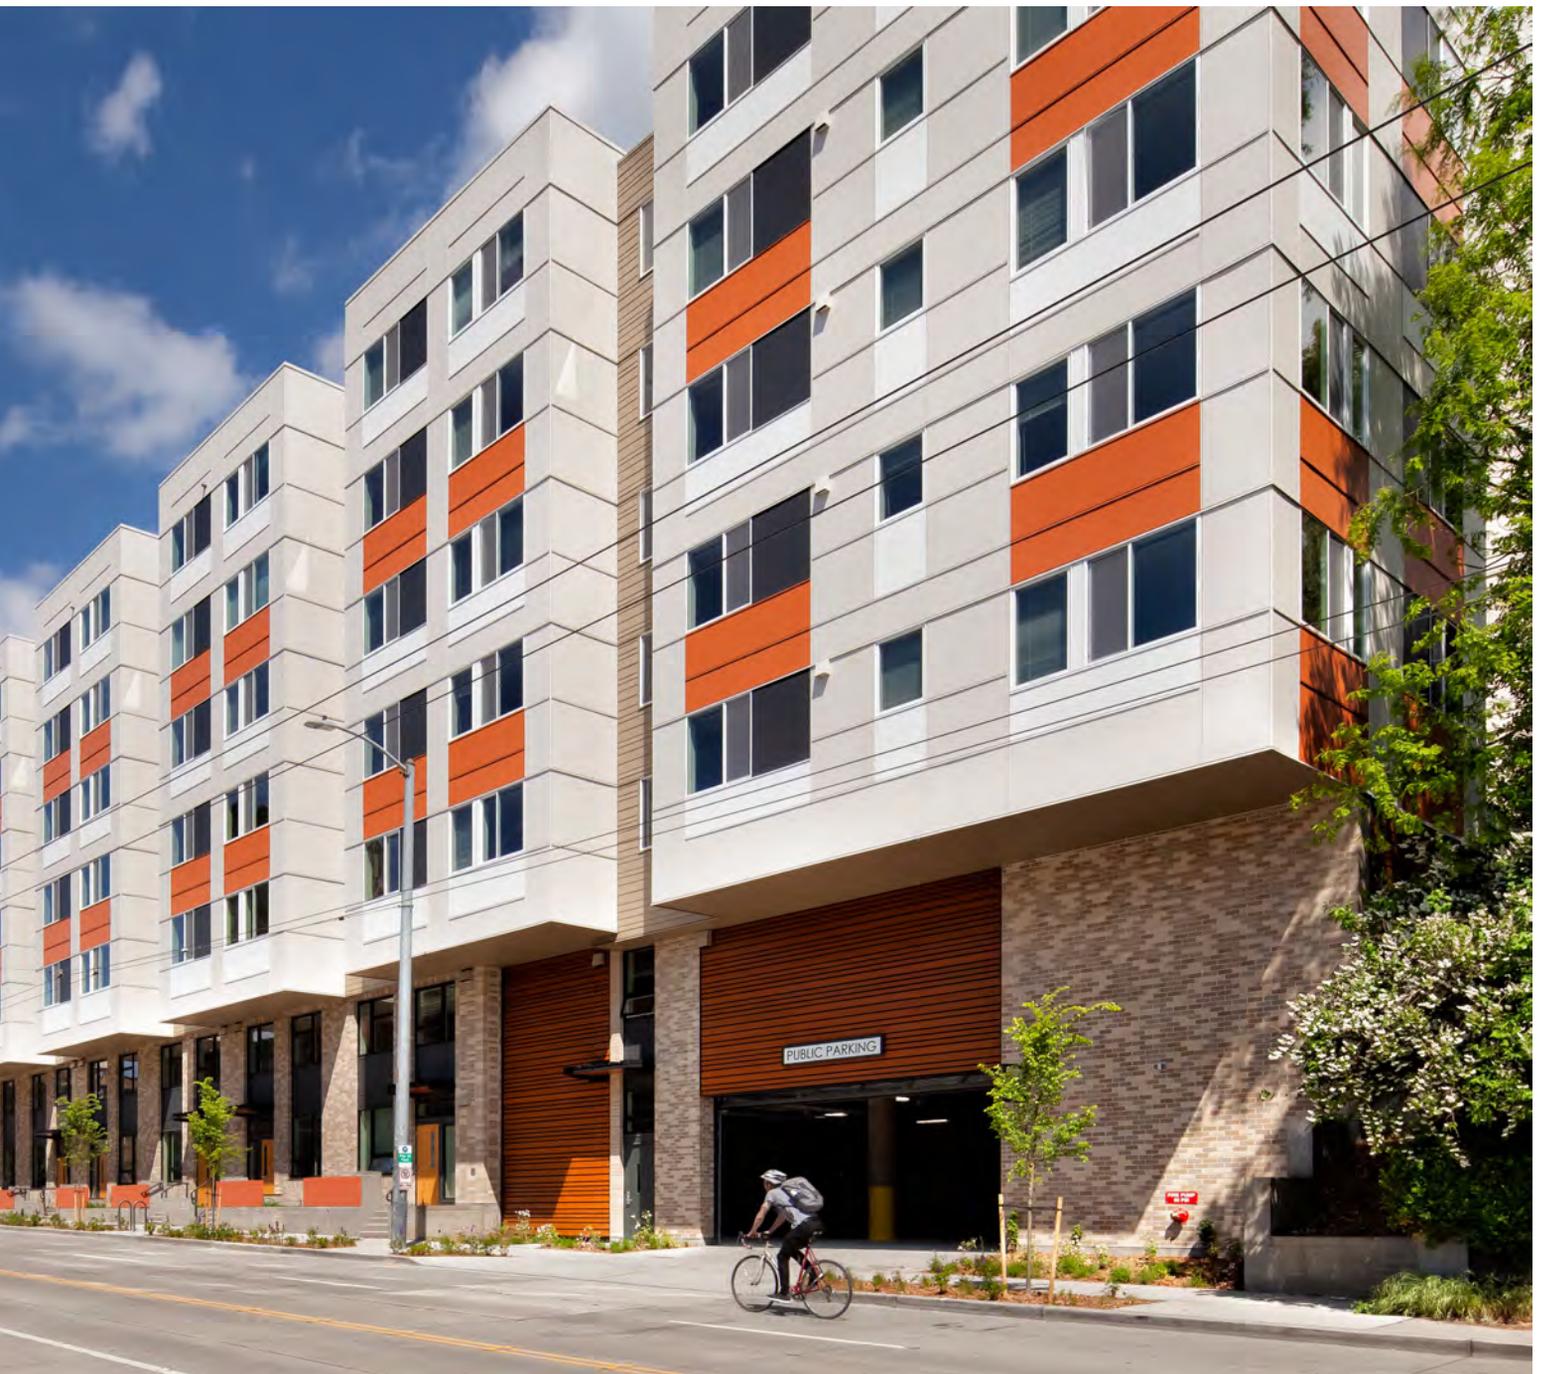

Architect	Momentum Design Group
Installer	Progressive Building Systems
Products	Link & Lock
Finish	White Oak
State	Minnesota
Country	U.S.A

The Luxe Apartments in Minnetonka showcase a refined blend of architectural detail and functional performance. The exterior incorporates Longboard's Tongue & Groove planks, Privacy Beam system, and Link & Lock™ battens, all finished in White Oak. Applied across decorative screens, fencing, gates, and passive sunshades, these woodgrain aluminum elements create texture while providing shade, privacy, and long-term durability.

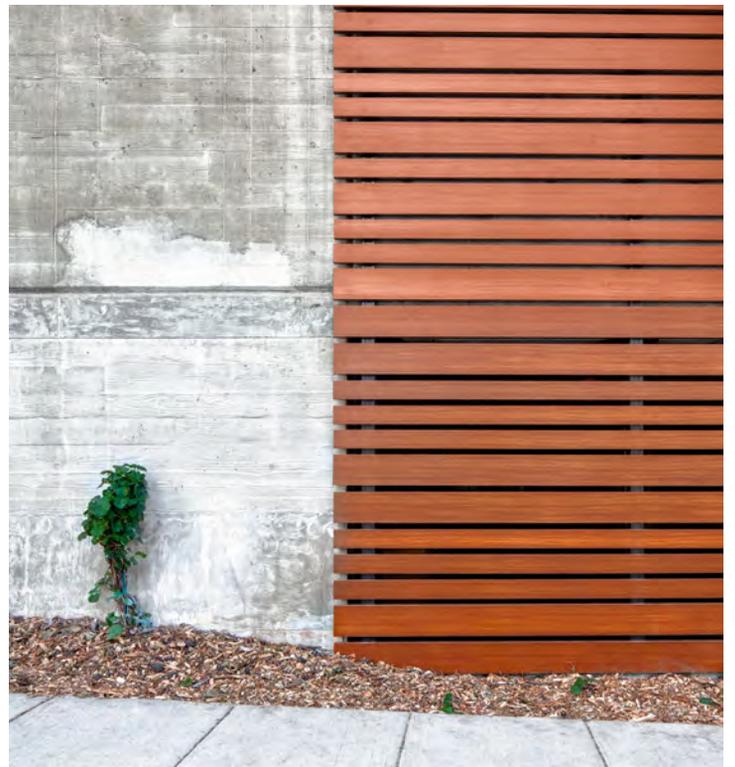

# ARBORA COURT

Architect	Kahler Slater
Installer	SRS Roofing & Metal Sheet Inc
Products	Tongue & Groove Planks
Finish	Light Cherry
State	Wisconsin
Country	U.S.A

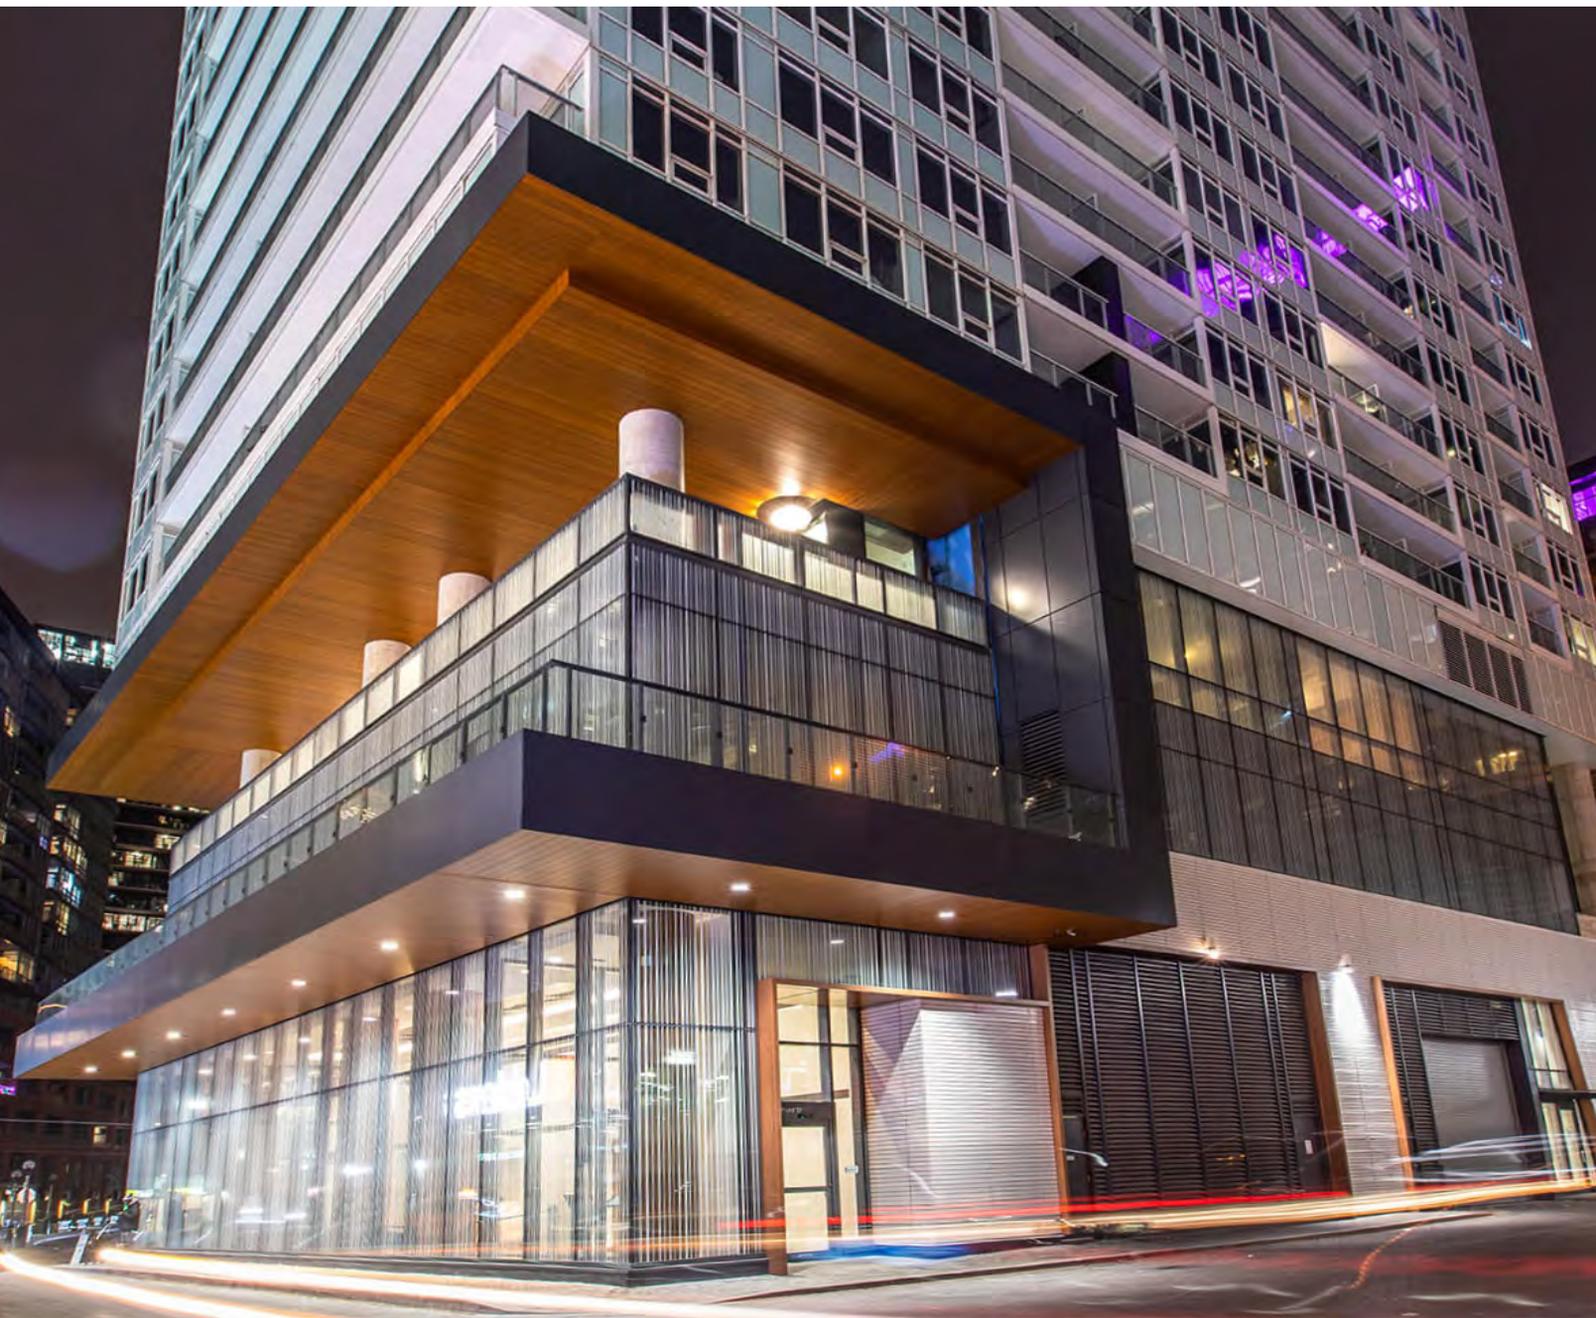

Arbora Court features Longboard's Link & Lock™ system in Light Cherry used as privacy screens and soffits. Installed along window edges and soffits throughout the exterior, the aluminum planks mimic the authentic texture of natural wood while providing durable, weather-resistant screening.

*"At the main corner, an artful entry 'legacy' panel welcomes residents and tells the story of the building and the unique partnership that made it possible. Wood-like slats and other natural durable materials are used to create a long-lasting, beautiful building." - Weber Thompson, Developer*

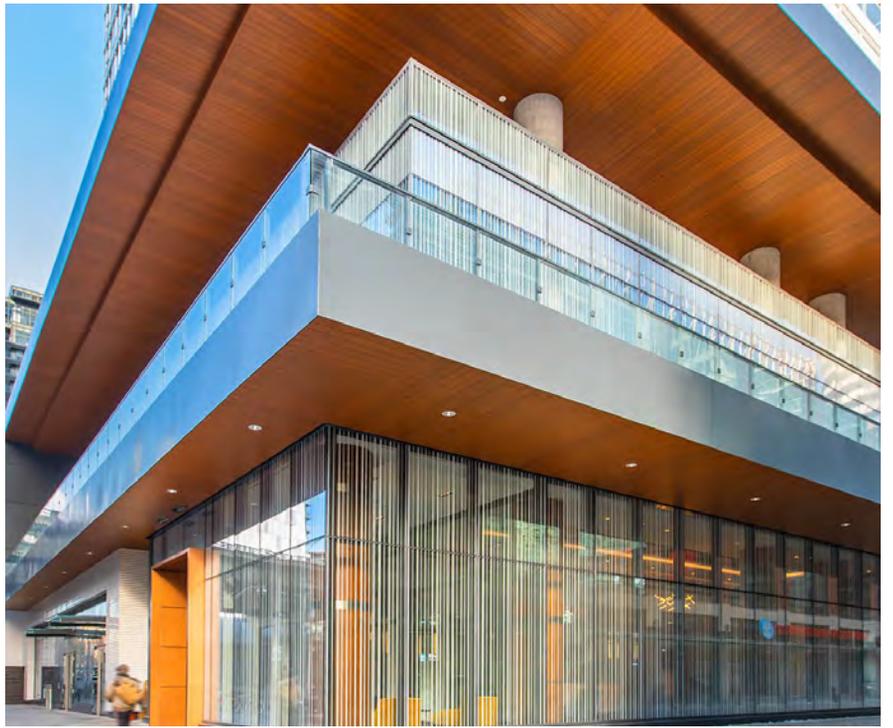

# LAKE SHORE CONDOS

Architect	Architects Alliance
Installer	EllisDon
Products	Tongue & Groove Planks
Finish	Dark Fir
State	Ontario
Country	Canada

The Lakeshore Condos showcase a sophisticated design that pairs modern living with natural elegance. Longboard's 6" V-Groove planks in Dark Fir are used for the feature soffits, adding rich woodgrain texture beneath the overhangs.

These accents beautifully elevate the sleek glass and metal exterior, creating shadows and visual warmth.

# THE COMMONS AT BALLARD

Architect	Studio Meng Strazzara
Installer	W.G. Clark Construction
Products	Tongue & Groove Planks
Finish	Dark Cherry, Dark National Walnut, Light Fir.
State	Washington
Country	U.S.A

The Commons at Ballard in Seattle reflects a modern approach to multifamily living with an emphasis on warmth and material expression.

The exterior features Longboard's Tongue & Groove system in a 6" V-Groove profile, clad in Dark Cherry, Dark National Walnut, and Light Fir finishes.

This layered palette of woodgrain aluminum siding creates depth and contrast on the façade, highlighting architectural lines while ensuring lasting performance in the Pacific Northwest's mercurial climate.

*"Material choices include a balance of robust and durable finishes with warm wood tones, speaking to the history of both maritime and timber industries in the neighborhood." - Studio Meng Strazzara, Architect*

# CORNWALL CUSTOM HOME

---

**Architect** Alain Carle Architecte

---

**Products** Tongue & Groove Planks

---

**Finish** Custom Black

---

**State** Ontario

---

**Country** Canada

---

This new standard for contemporary rural architecture in the community is a minimalist masterpiece. Set against the tranquil, snowy landscapes of Ontario, this custom home features Longboard's 4" V-Groove Tongue & Groove siding in a custom black finish.

The product is used as exterior cladding to create a bold contrast with the natural concrete and expansive glazing. The stark black aluminum siding enhances the home's geometry while providing exceptional durability in Canada's harsh winters.

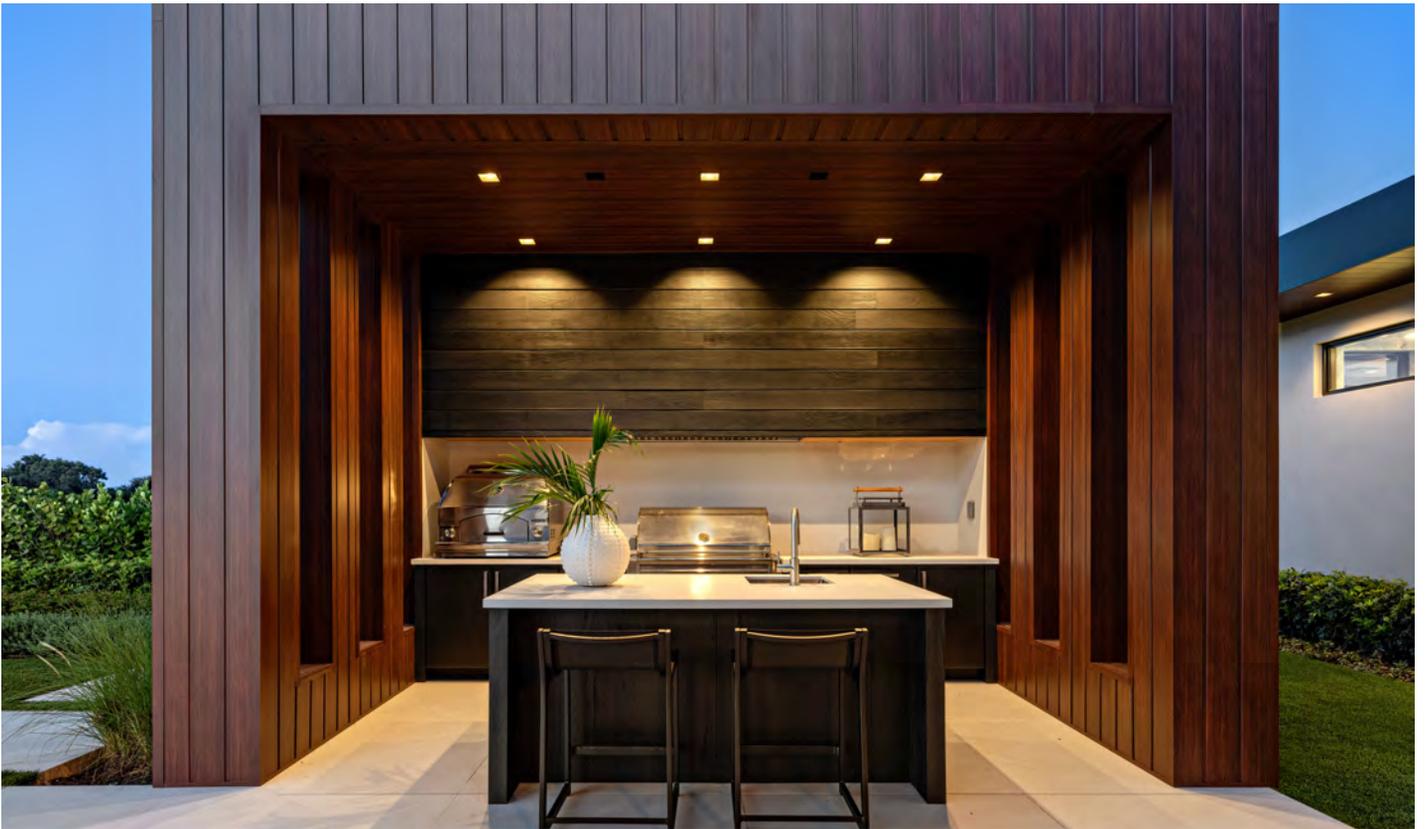

*"The project proposes a direct relationship to the sky, horizon and wind rather than its immediate suburban surroundings."  
- Alain Carle, Architecte*

# MARIGOLD EQUESTRIAN HOME

Architect	In-Site Design Group
Installer	Windham Builders
Products	Tongue & Groove, Link & Lock
Finish	Dark National Walnut
State	Florida
Country	U.S.A

# MARIGOLD EQUESTRIAN ESTATE

Architect	In-Site Design Group
Installer	Windham Builders
Products	Tongue & Groove, Link & Lock
Finish	Dark National Walnut
State	Florida
Country	U.S.A

This stunning estate features a range of Longboard's product line across the cladding and soffits, both interior and exterior, using Tongue & Groove, Link & Lock, and privacy beams.

The homeowner worked closely with the design team to focus on shaping a bold, contemporary design while ensuring rigorous functional performance.

# EAGLE MOUNTAIN

---

**Architect** Su Casa Design

---

**Installer** Buzzsaw Construction

---

**Products** Tongue & Groove

---

**Finish** Table Walnut

---

**State** British Columbia

---

**Country** Canada

---

A custom-built single-family residence in British Columbia, featuring Longboard's Table Walnut Tongue & Groove planks to create a sleek, timeless façade that brings together West Coast-inspired contemporary architectural beauty.

# MAPLE RIDGE FARMHOUSE

Products	Board & Batten, Lap Siding
Finish	Bone White
State	British Columbia
Country	Canada

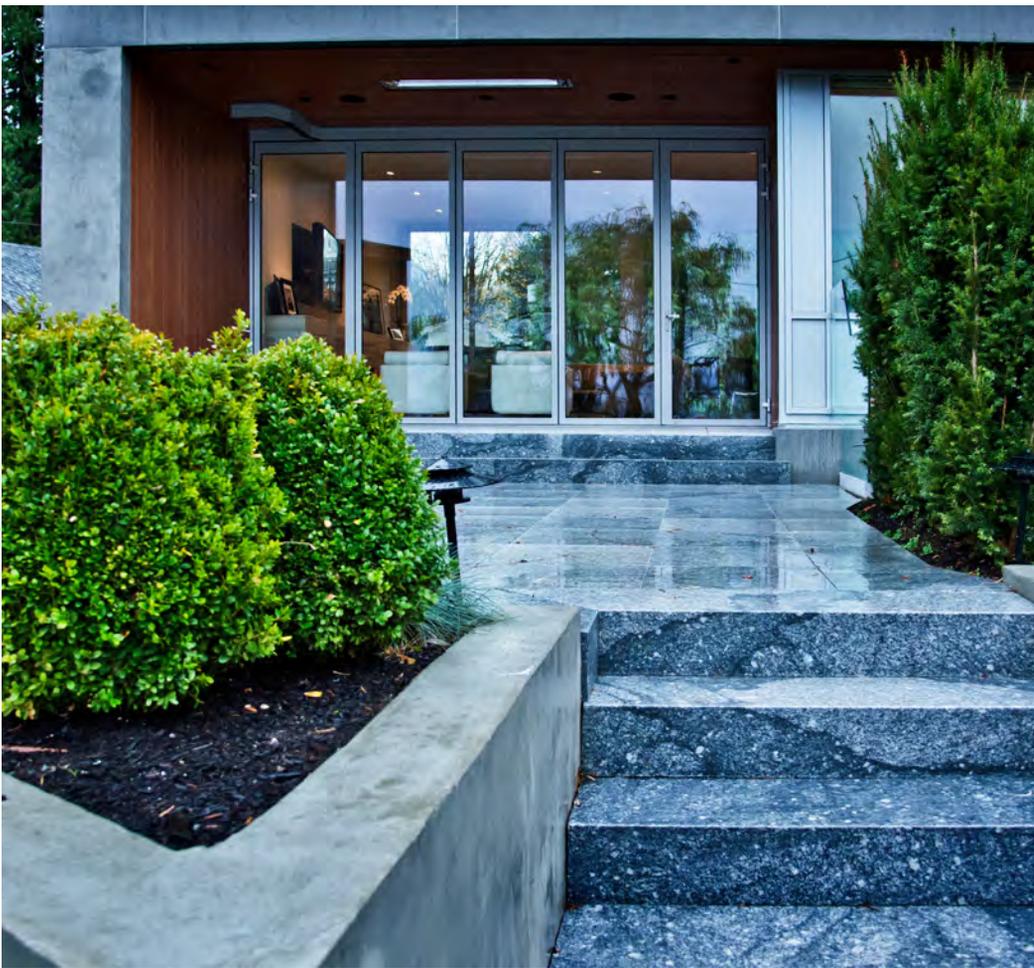

This custom home is a strong example of how traditional design can be achieved using modern, long-lasting materials.

Featuring Longboard's Lap Siding and Board & Batten profiles, this residence captures a timeless, family-friendly aesthetic while ensuring durability for decades to come.

# LINDELL BEACH

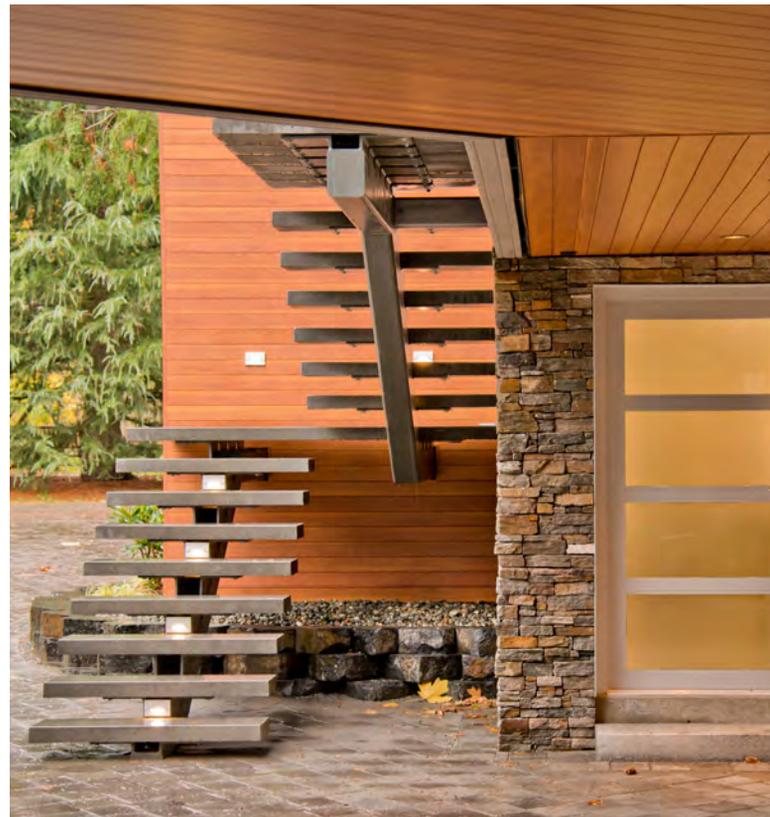

Architect	X Architecture
Installer	Mike Lobe
Products	Tongue & Groove Planks
Finish	Custom Color, Light Cherry
State	British Columbia
Country	Canada

Nestled along the shoreline of Lindell Beach, this beach house is a stunning example of West Coast contemporary design.

The home features a combination of Longboard's V-Groove Tongue & Groove planks, as well as Channel siding in Light Cherry and Charcoal finishes. Appearing in both soffits and exterior cladding, the mixed profiles and contrasting tones create a dynamic and cohesive façade.

# CULTUS LAKE

<b>Architect</b>	X Architecture
<b>Installer</b>	Mike Lobe
<b>Products</b>	Tongue & Groove, Link & Lock
<b>Finish</b>	Custom Color, Bone White
<b>State</b>	British Columbia
<b>Country</b>	Canada

Nestled along the shoreline of Lindell Beach, this beach house is a stunning example of West Coast contemporary design.

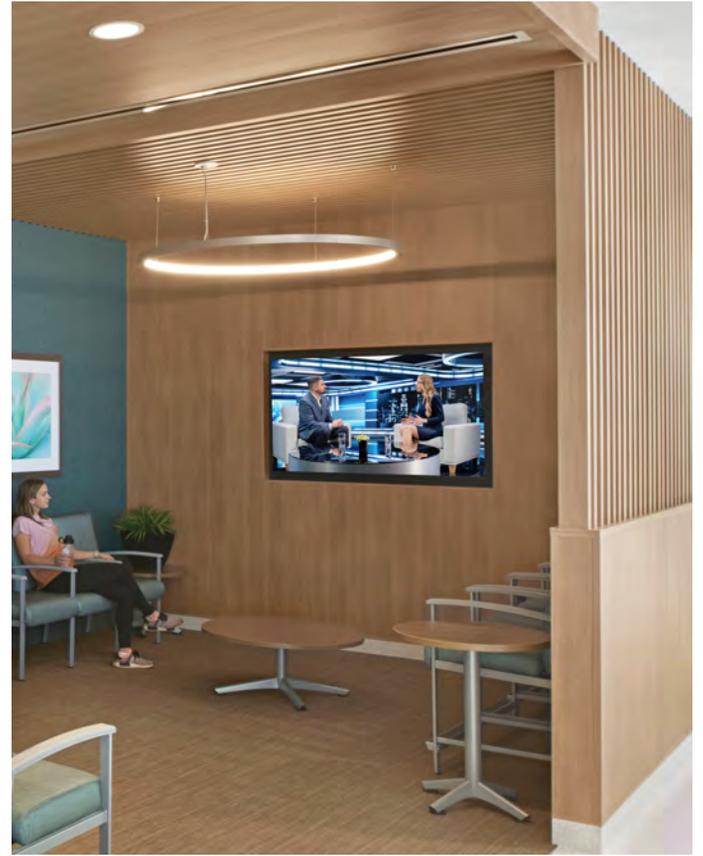

The home features a combination of Longboard's V-Groove Tongue & Groove planks, as well as Channel siding in Light Cherry and Charcoal finishes. Appearing in both soffits and exterior cladding, the mixed profiles and contrasting tones create a dynamic and cohesive façade.

# CULINARY HEALTH CARE

Architect	CSD
Installer	Southwest Specialty Contractors
Products	Tongue & Groove, Link & Lock
Finish	Custom Color
State	Nevada
Country	U.S.A

Located in Las Vegas, this healthcare facility incorporates Longboard's Tongue & Groove planks in a 6" Smooth profile alongside Link & Lock™ systems throughout its interior spaces.

The combination of clean, contemporary design and smooth finishes adds warmth, texture, and visual interest while maintaining a low-maintenance interior for high-traffic healthcare environments.

# EBATA OPTOMETRY

---

**Architect** Something Good Interiors

---

**Installer** Kellermeier Contracting Ltd.

---

**Products** Dauntless Beams

---

**Finish** Light Bamboo

---

**State** British Columbia

---

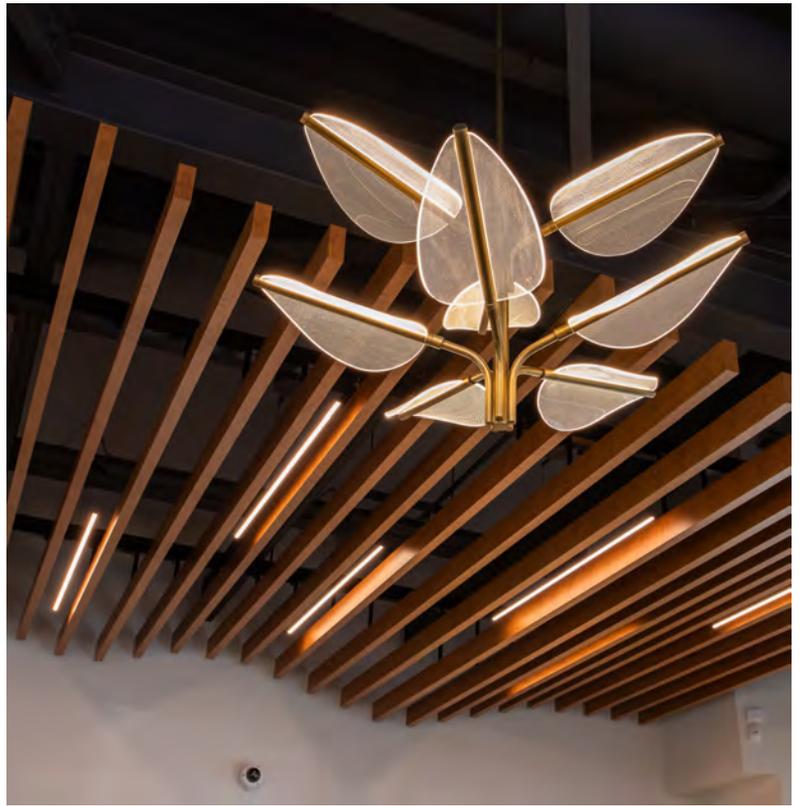

**Country** Canada

---

Ebata Optometry features Longboard's Dauntless™ system in Light Bamboo on its interior ceilings. These interlocking aluminum panels showcase a subtle wood-grain texture and soft, natural hue, offering the warmth of timber while delivering excellent durability, fire safety, and low maintenance.

Installed across reception areas, exam rooms, and retail zones, the Light Bamboo ceilings unify the spatial flow and enhance acoustics, reinforcing a calm, professional atmosphere.

*"We were looking for a way to differentiate ourselves and build something that hasn't been done in Kamloops before," Dr. Ebata*

# OPUS CARE OF SOUTH FLORIDA

---

**Architect** Candela & Partner

---

**Installer** Jones Signs

---

**Products** Link & Lock

---

**Finish** Bone White

---

**State** Florida

---

**Country** U.S.A

---

Opus Care features Longboard's Link & Lock™ system on its exterior as a prominent architectural façade. The aluminum panels provide both visual elegance and functional shading.

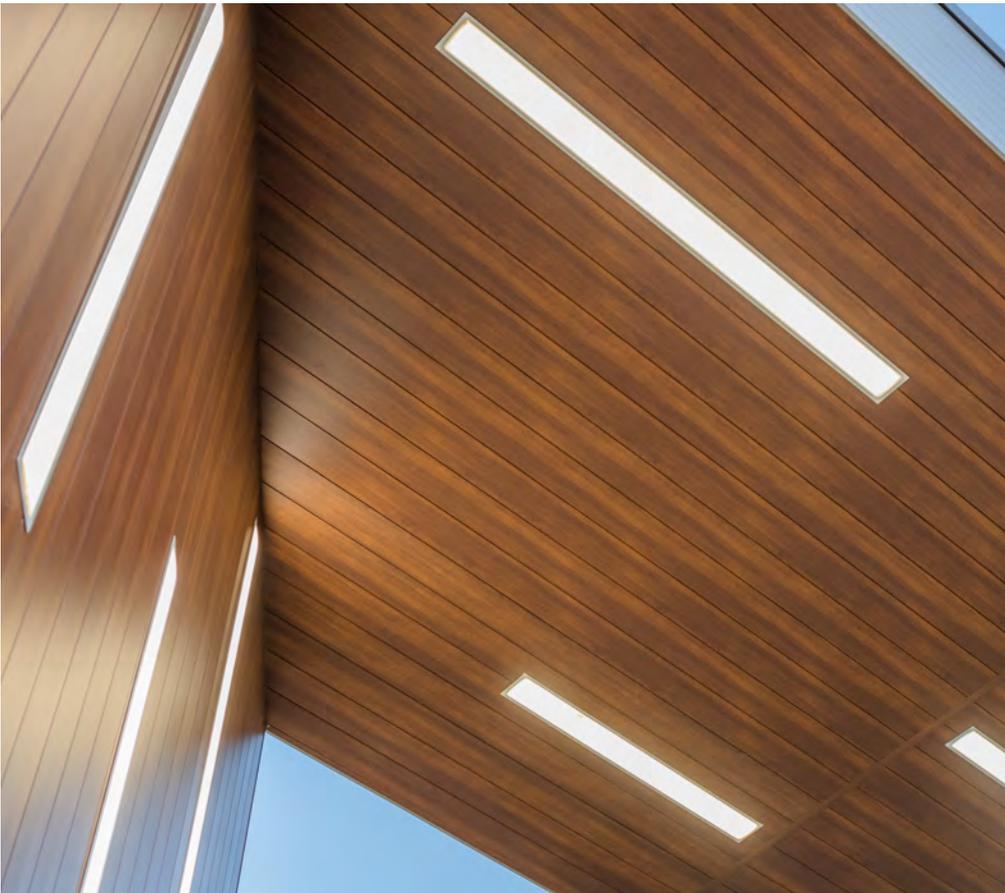

The screen adds texture and depth to the building's modern design while offering durability and low maintenance in the demanding Florida climate.

This design element helps define the facility's welcoming presence, reflecting its commitment to comfort, care, and contemporary design.

# COMMUNITY HEALTH CONNECTION

Architect	KKT Architects
Installer	M.L Jones LLC
Products	Tongue & Groove
Finish	Dark National Walnut
State	Oklahoma
Country	U.S.A

Community Health Connection features a grand entrance overhang using Longboard's 6" Tongue & Groove planks in Dark National Walnut.

This design extends from exterior into the interior soffits of the building to bring together a seamless and integrated look that reflects their commitment to the community's health and wellness needs.

# BROOKLINE HIGH SCHOOL

Architect	William Rawn Associates
Installer	Lymo Construction Co
Products	Tongue & Groove
Finish	Light Cherry
State	Massachusetts
Country	U.S.A

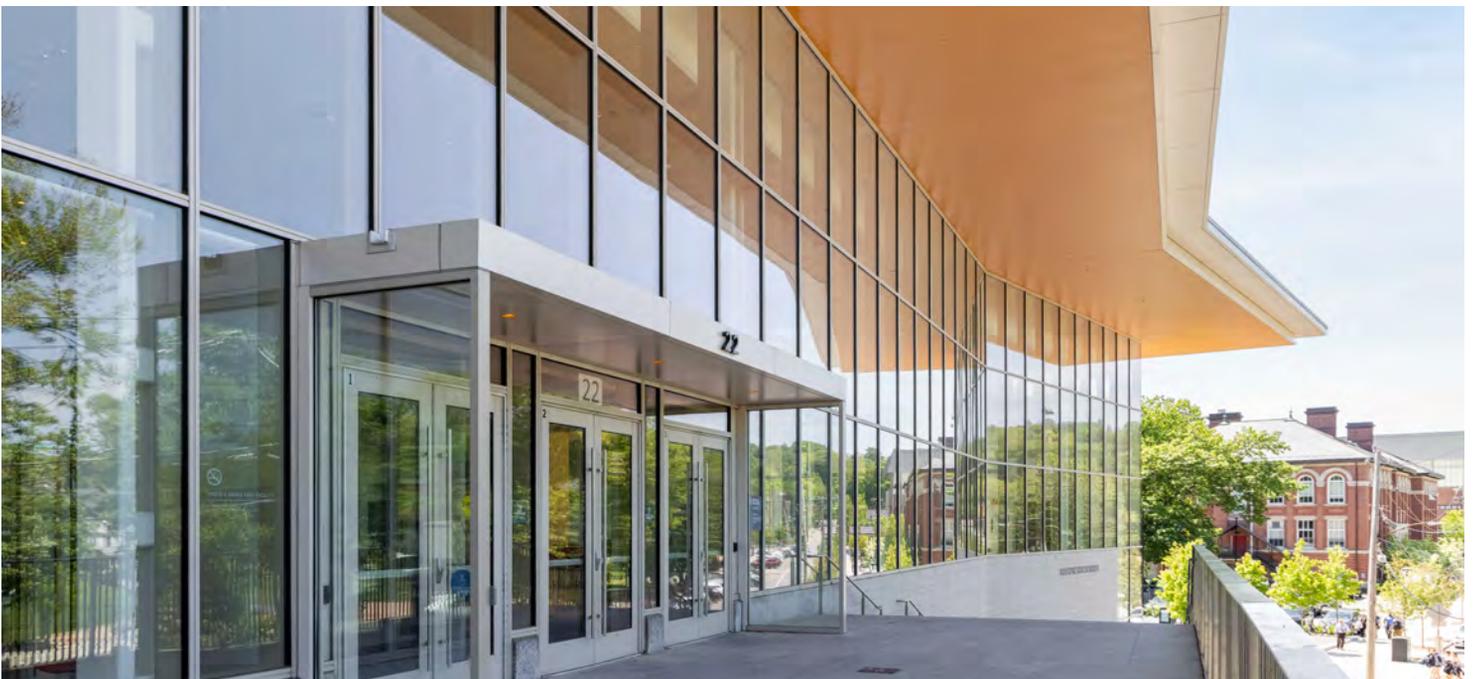

Built over the train tracks in Massachusetts, this design came together to balance old New England elegance and an urban style. Featuring Longboard's Tongue & Groove planks in Light Cherry on the soffits of its generous overhangs, it elevates and enhances the structure of the building's façade.

*"Seeing people enjoying the space. Seeing students fill the front porch. That's the most exciting thing for us as architects." - Architect Andy Jonic of William Rawn Associates*

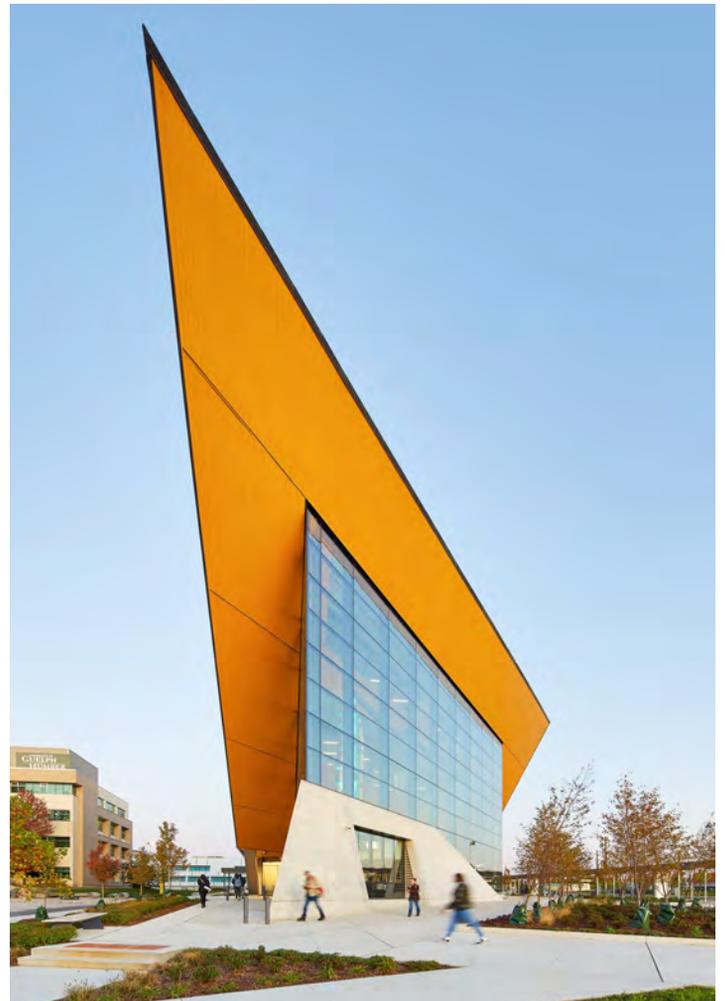

# HUMBER COLLEGE

<b>Architect</b>	Perkins + Will Toronto
<b>Installer</b>	Bothwell Accurate Co. Inc.
<b>Products</b>	Tongue & Groove
<b>Finish</b>	Light Oak
<b>State</b>	Ontario
<b>Country</b>	Canada

Humber College in Ontario features Longboard's Light Oak Tongue & Groove Planks with a 6" V-Groove for exterior cladding and siding, bringing a warm, natural aesthetic to this academic facility. The visuals tie in the sophistication and durability while remaining committed to the building's sustainability and innovation. As a leading-edge educational hub, they play a vital role in shaping the future of skilled trades and emerging technologies, with Longboard's materials reinforcing its modern identity and inspiring presence on campus and in the broader community.

*"We wanted people to arrive at campus thinking, 'What is that building, and what's going on inside?' I think we achieved that. It does elicit that kind of wonder." - Scott Valens, Director of Capital Development at Humber College*

# NORTHERN LAKES COLLEGE

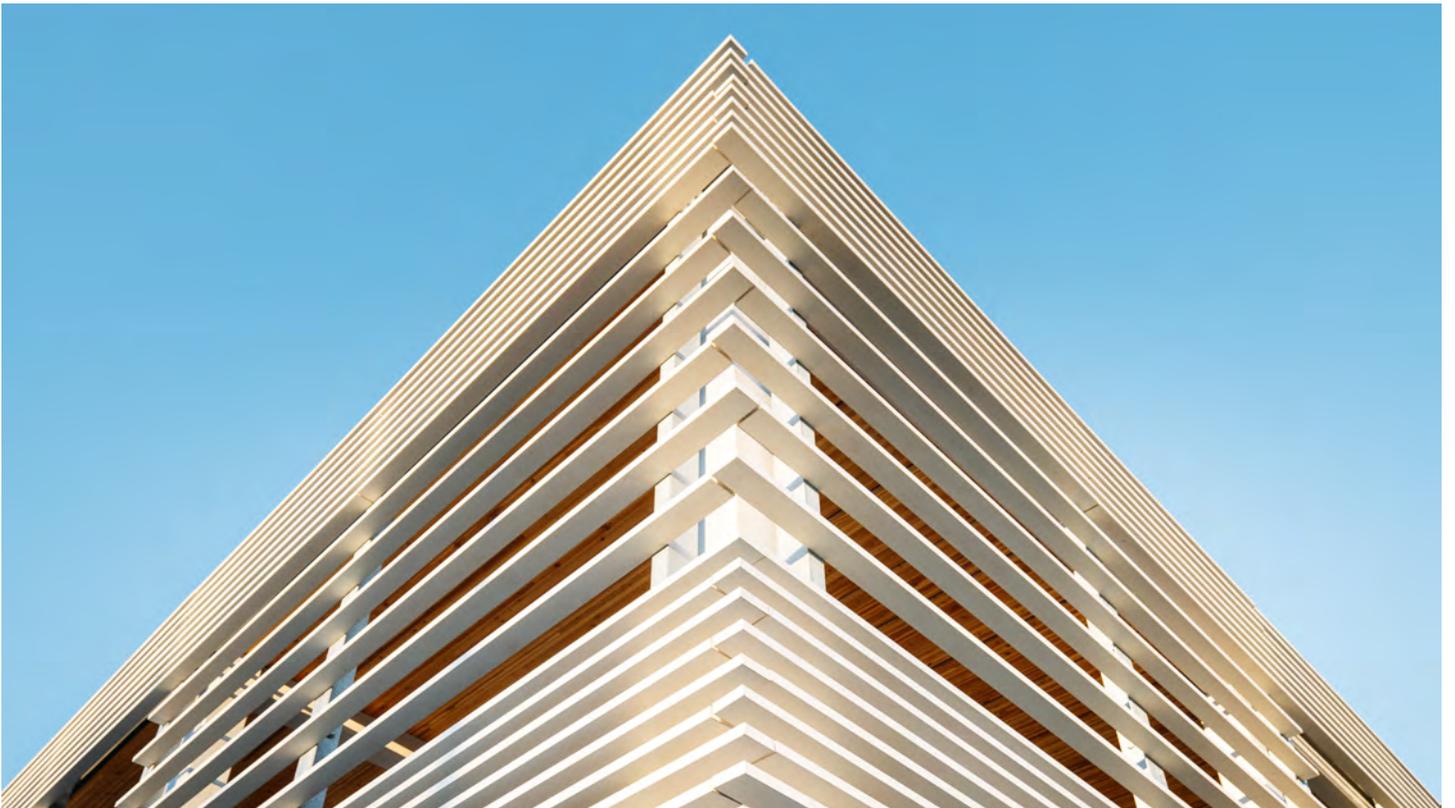

<b>Architect</b>	Reimagine Architects
<b>Installer</b>	Clarke Builders
<b>Products</b>	Link & Lock
<b>Finish</b>	Birchwood
<b>State</b>	Alberta
<b>Country</b>	Canada

Northern Lakes College's High Prairie campus in Alberta is a leading-edge educational facility that combines sustainable architecture with the community. The college stands out using Longboard's Link & Lock™ system, showcasing sleek, vertical accent cladding. The warm woodgrain brings together the campus's structure and its natural northern setting.

*The building's impressive sustainability profile owes largely to the design team's collaborative and integrative process. Finishes, energy performance, fire-rating, and structural materials were each considered, along with cost." - Vedran Škopac, Principal at Reimagine Architects*

# RAY CROWE ELEMENTARY

Architect	Circle Design Group
Installer	Circle B Construction Systems
Products	Tongue & Groove
Finish	Dark Bamboo, Light Bamboo
State	Indiana
Country	U.S.A

A bold, and modern entrance defined by a deep overhang clad in alternating Light and Dark Bamboo Longboard panels to accentuate the structure's clean lines and adds movement to the façade.

This prominent soffit detail creates a visually engaging canopy, guiding students and visitors into a welcoming space. This architectural feature sets the tone for a vibrant, inclusive learning environment and reflects the school's commitment to forward-thinking design and community pride.

# MIRA COSTA COLLEGE

Architect	HMC Architects
Installer	Buxcon Sheet Metal
Products	Tongue & Groove
Finish	Light Cherry
State	California
Country	U.S.A

Located in California, this college showcases a thoughtfully designed façade that pairs modern design and natural warmth, mirroring the campus's coastal location.

Longboard's woodgrain 6" V-Groove planks in Light Cherry are used extensively, on both soffits and vertical cladding, to introduce a harmonious contrast against sleek glass elements and crisp architectural forms.

# ABBOTSFORD TRADITIONAL SCHOOL

Architect	Station One Architects
Installer	Bothwell Accurate
Products	Tongue & Groove
Finish	Light Fir
State	British Columbia
Country	Canada

At Abbotsford Traditional School, material choices help create a beautiful, durable, and welcoming environment for students, staff, and visitors.

The exterior soffits are finished in Longboard's Tongue & Groove planks in Light Fir, adding a subtle woodgrain accent that softens the building's modern form.

# ÉCOLE NOTRE DAME

Architect	Benoît Lalonde / TLA Architectes
Installer	Aluminium André Gagnon
Products	Tongue & Groove
Finish	Blonde Oak
State	Quebec
Country	Canada

École Notre-Dame in Quebec is a vibrant educational institution that combines contemporary design with a nurturing atmosphere for students and educators. The building's exterior is finished with Longboard's 6" V-Groove Tongue & Groove planks in Blonde Oak, delivering a light, natural wood-look finish that adds warmth and brightness to the school's façade.

# MISSOULA AIRPORT

<b>Architect</b>	A&E Architects
<b>Installer</b>	Metalworks of Montana
<b>Products</b>	Tongue & Groove
<b>Finish</b>	Light Oak
<b>State</b>	Montana
<b>Country</b>	U.S.A

The Missoula Montana Airport terminal features a façade that thoughtfully balances modern design with regional character.

Expansive windows bring in abundant natural light and offer stunning views of the surrounding mountain landscape, while also supporting energy efficiency through solar control.

To complement the sleek glass exterior, Longboard's woodgrain 6" V-Groove planks in Light Oak were used on the soffits beneath the terminal's large entrance overhangs. The result is an inviting and functional entrance that reflects the natural beauty of Montana while enhancing the traveller experience.

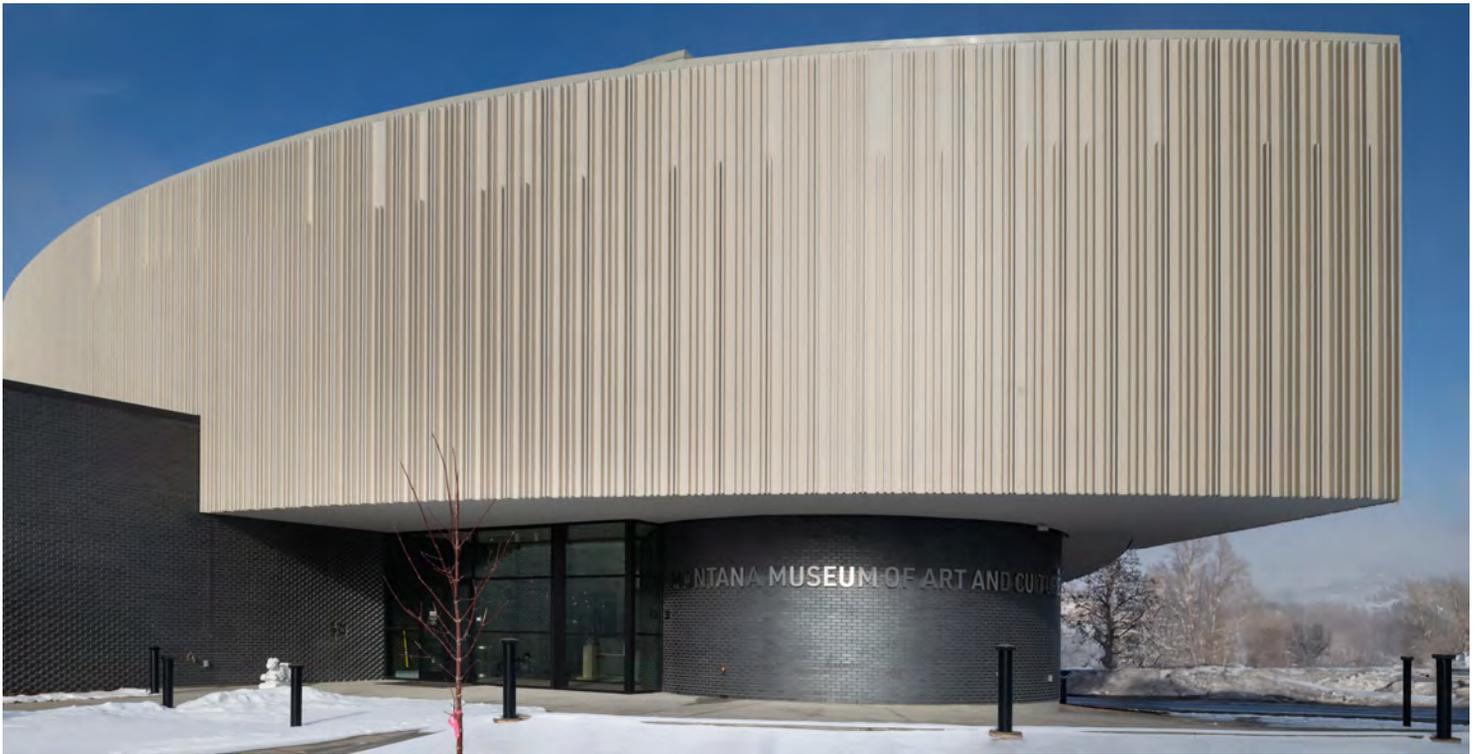

*"Missoula Montana Airport came to A&E Design with a very specific goal in mind: to enhance the passenger experience through "Montana Modern" design. The exterior architecture speaks to flight with its flat, modern roofline gradually rising to the West while the new terminal enhances passenger experiences, optimizes energy efficiency, and accommodates future growth." - A&E + SMA Design*

# MONTANA MUSEUM

Architect	A&E Design
Installer	TG Glass
Products	Link & Lock
Finish	Birchwood
State	Montana
Country	U.S.A

The Montana Museum of Art and Culture is the state's oldest and most extensive art museum. Founded in 1894, it holds nearly 12,000 works, with a focus on the Rocky Mountain West.

The 17,000-square-foot facility features Longboard's Tongue & Groove in a Birchwood finish, includes two galleries, a lobby, a classroom, a library, a gift shop, and a storage vault.

Built for both function and preservation, the museum incorporates cutting-edge technology, advanced security, and improved accessibility to protect and showcase the collection.

*"It's been simply spectacular, not just in increased attendance to the MMAC, but also in folks' responses to the architecture of the new building and the richness of the Permanent Collection," said Rafael Chacon, director of the MMAC.*

# IMMIGRANT SERVICES SOCIETY

---

**Architect** Henriquez Partners Architects

---

**Installer** Mierau Contractors Ltd.

---

**Products** Tongue & Groove

---

**Finish** Dark Fir

---

**State** British Columbia

---

**Country** Canada

---

The Immigration Services Society of BC provides short-term and long-term housing, medical services, and English language training.

Consisting of two separate buildings, six and four storeys high respectively, featuring Longboard cladding in Dark Fir and custom Light Grey throughout the soffits, cladding and siding to create a modern yet inviting atmosphere.

# CALIFORNIA ENGLISH

Architect	PGAL
Installer	Ehmcke Sheet Metal
Products	Link & Lock
Finish	Light Bamboo
State	California
Country	U.S.A

*"PGAL Architects designed both the interior and exterior space at California English with a style they describe as whimsical and approachable." San Diego Magazine*

A modern eatery features Longboard's Link & Lock™ system in Light Bamboo across multiple architectural elements, including decorative screens, fencing, gates, pergolas, and ceilings. The warm, natural tone of Light Bamboo adds a refined yet welcoming aesthetic throughout the space, reinforcing the restaurant's relaxed California identity.

# CHICKEN N` PICKLE

Architect	Populous
Installer	Construction Ahead
Products	Link & Lock
Finish	Light National Walnut
State	Arizona
Country	U.S.A

Chicken N` Pickle in Arizona is an indoor and outdoor entertainment destination that combines dining, a social space, and Pickleball.

This venue features a thoughtful combination of materials to complement its vibrant, community-oriented atmosphere. Longboard's products play a key role in the architecture, with wood-grain aluminum cladding and siding adding warmth, texture, and contrast across the building's façade.

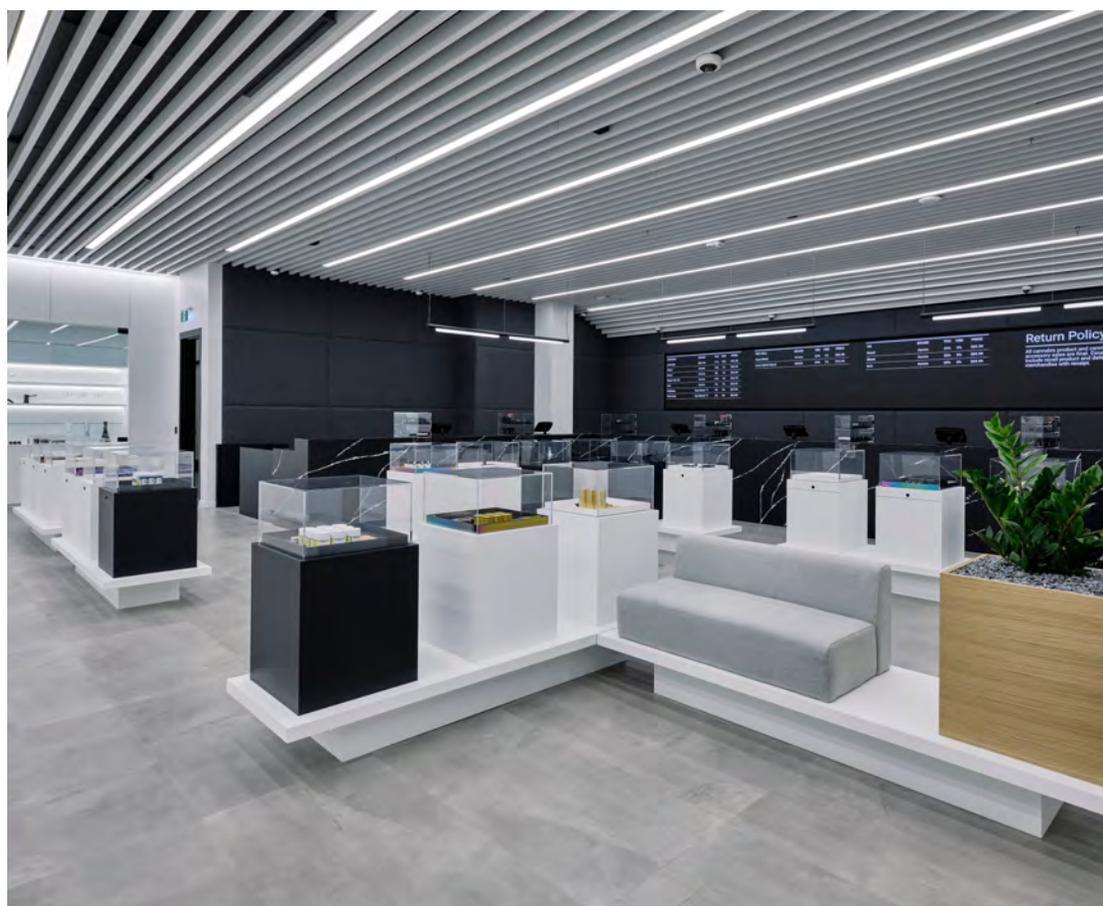

# AURORA

<b>Architect</b>	GMC Architects / Bruce Mau Design
<b>Products</b>	Link & Lock / Intrepid
<b>Finish</b>	Bone White
<b>State</b>	Alberta
<b>Country</b>	Canada

This cannabis retail store in Edmonton features a striking focal point throughout the space: a dramatic ceiling accent crafted using Longboard's Intrepid Beam™ system.

These bold, linear aluminum beams in a refined woodgrain finish create a seamless flow in this modern and neutral store interior.

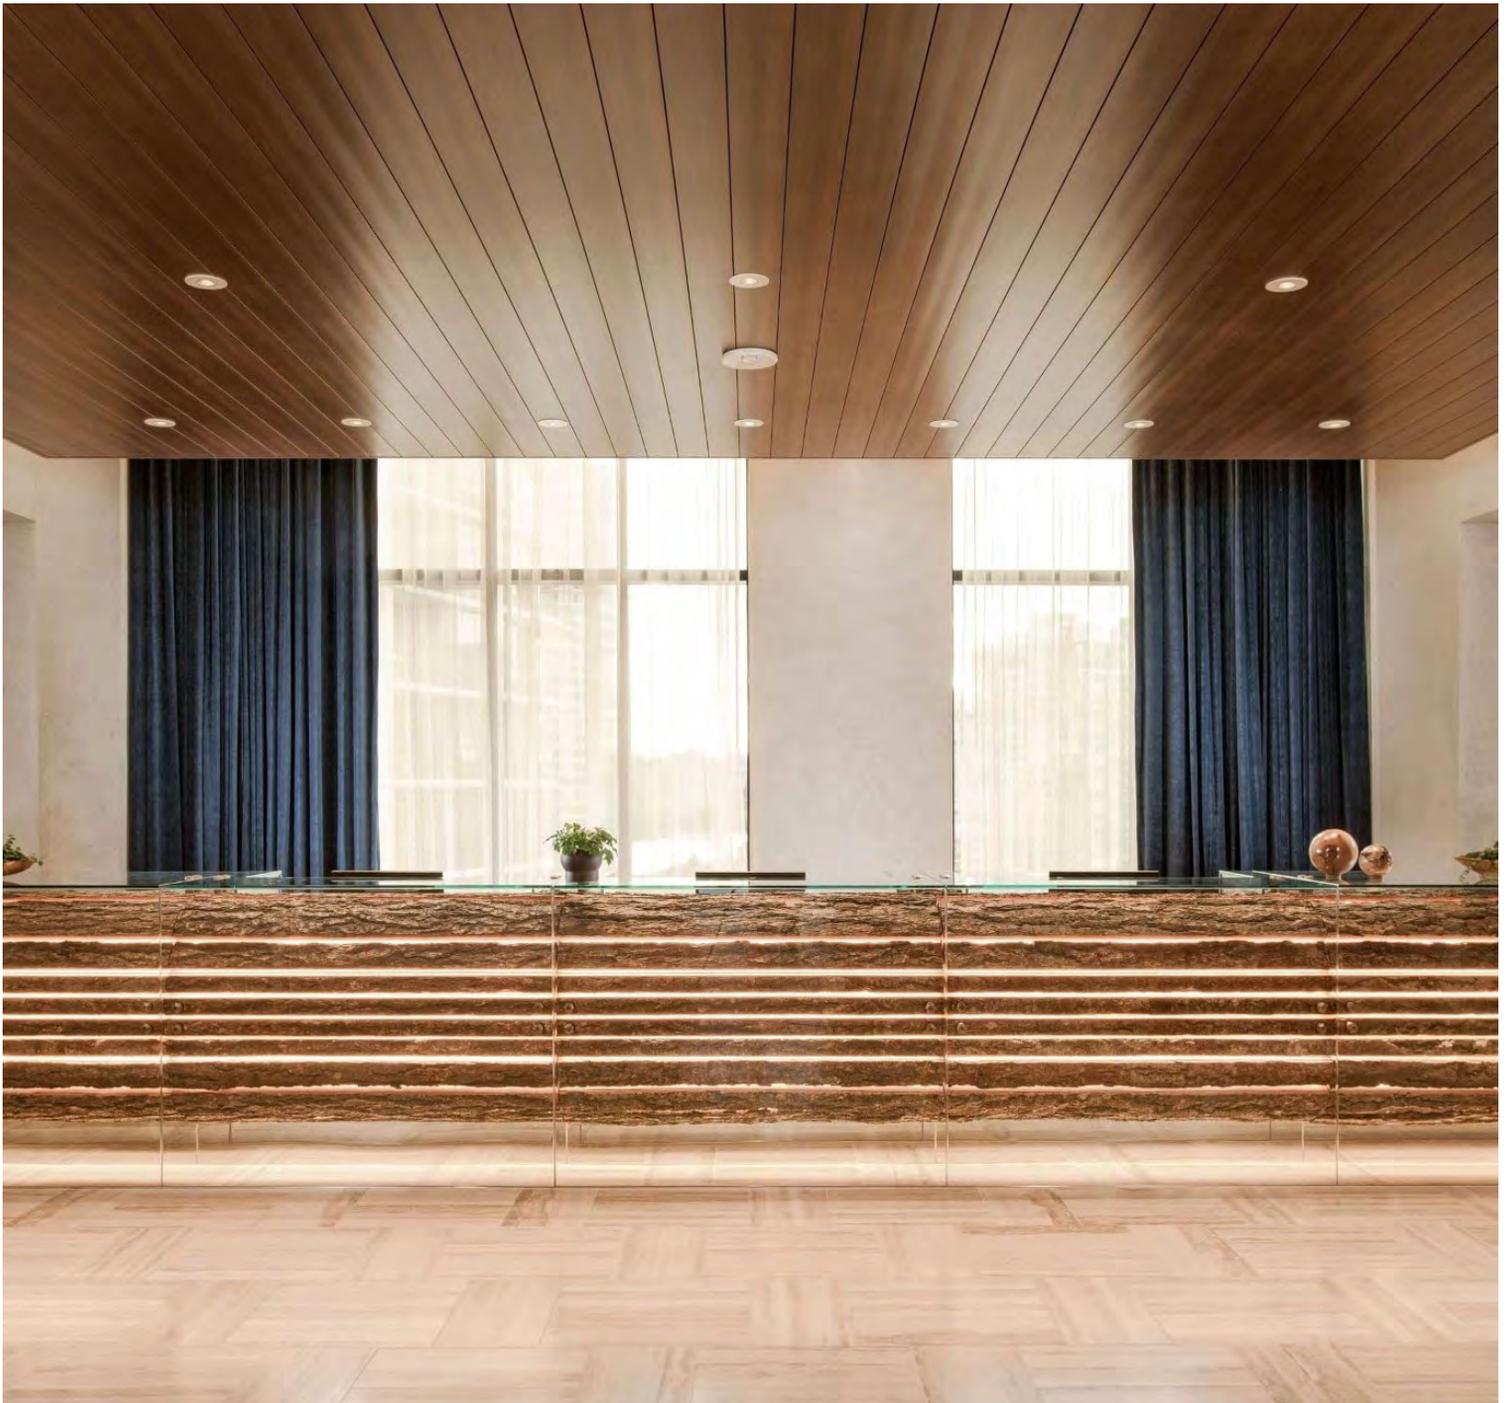

*"The overarching design concept explores the relationship between the natural elements that are core to the Aurora brand, and the state-of-the-art production and commitment to industry advancement that drive the company's vision. References to mountains, sky, water and sun permeate through material, lighting and digital experiences."*

*- Bruce Mau Design*

# DOUGLAS HOTEL

Architect	Celano Design Studio
Products	Tongue & Groove
Finish	Light National Walnut
State	British Columbia
Country	Canada

The Douglas is a luxury boutique destination that merges both nature and urbanization. This hotel expertly integrates Longboard's 4" V-Groove Tongue & Groove planks in Light National Walnut throughout the interior and exterior design.

The material is applied across exterior cladding, soffits, interior ceilings, and wall treatments to create a cohesive and sophisticated look.

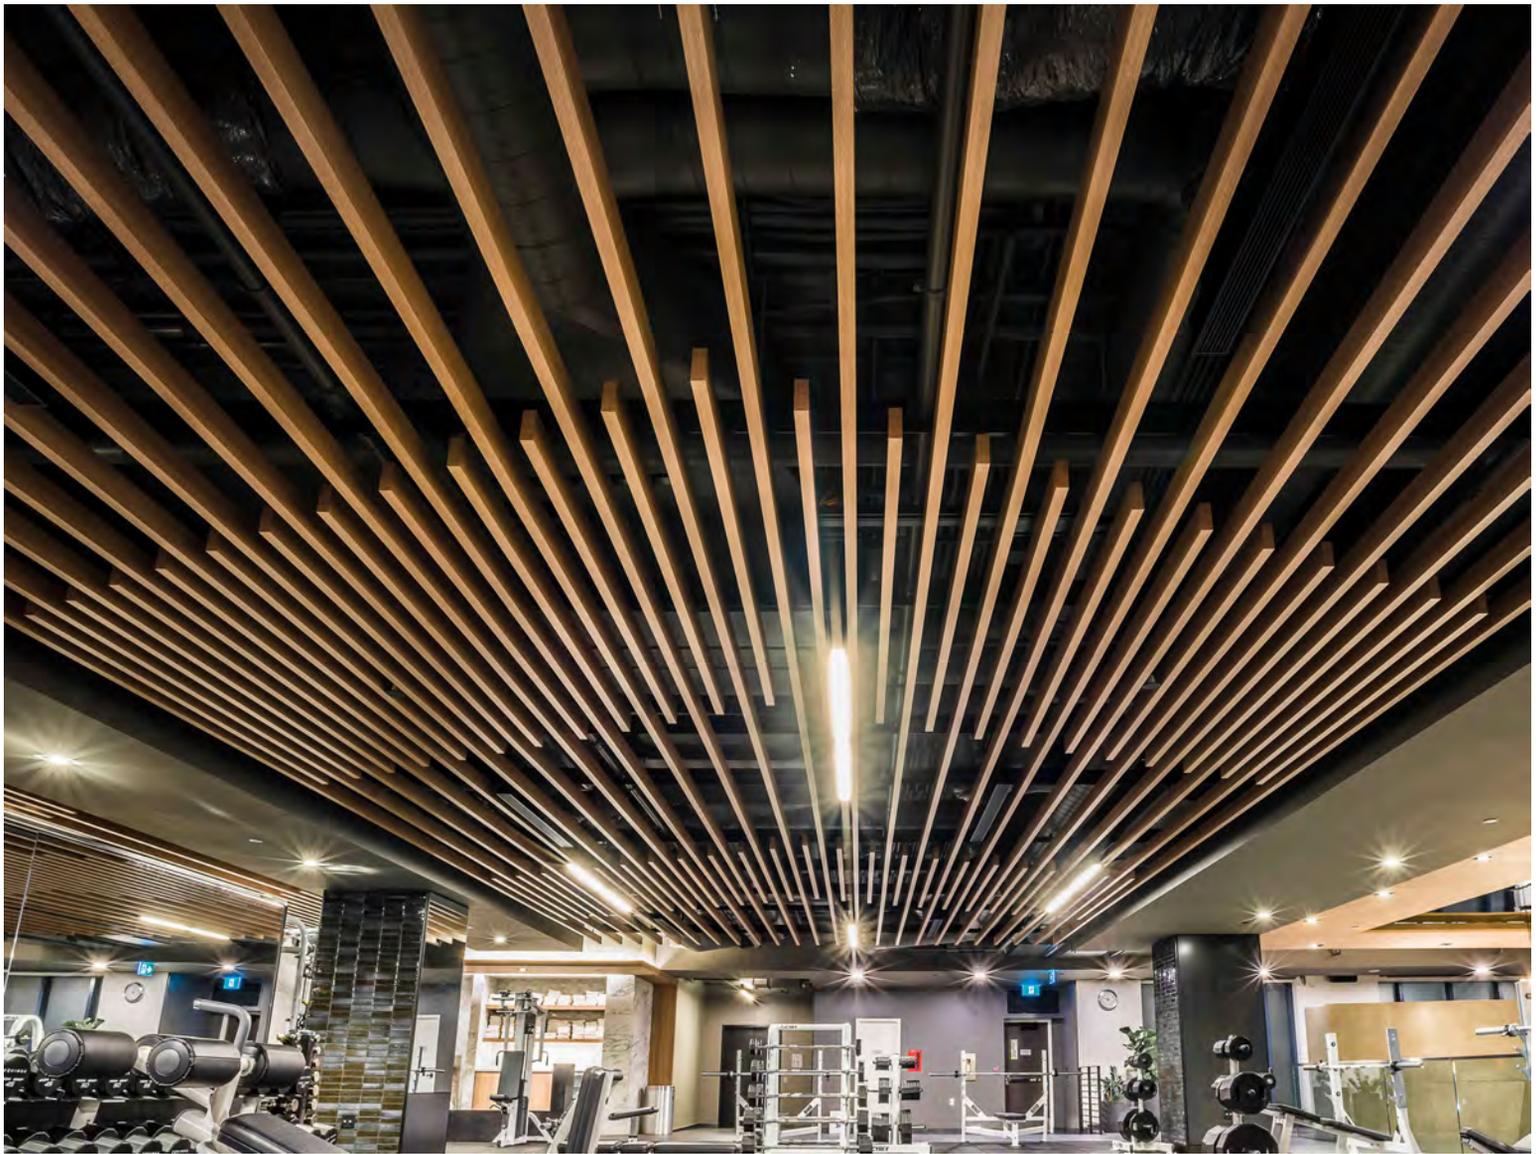

*"For us, the architecture became a part of a story that has a lot to do with abstractions of nature," Celano continues. "The lobby, for example, is about capturing framed views of what is literally a forest floating in the sky." - Vincent Celano, principal of Celano Design Studio*

# EQUINOX

<b>Installer</b>	Novacom Construction Ltd
<b>Products</b>	Dauntless
<b>Finish</b>	Custom Color
<b>State</b>	British Columbia
<b>Country</b>	Canada

Seamlessly integrated into this gym's ceilings, Longboard's Dauntless System is used for both acoustics and visual appeal to hide the usual exposed mechanical systems.

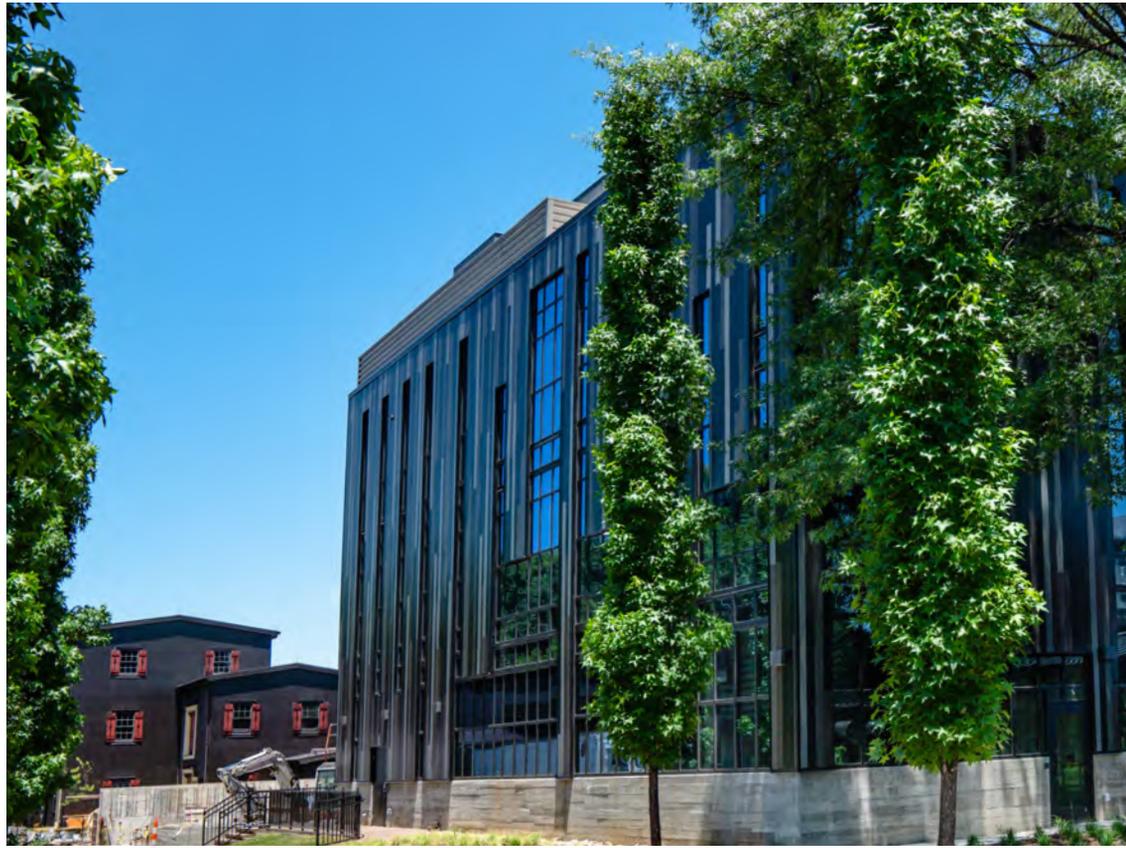

Created in a custom color to tie together Equinox's typically moodier branded tones.

# MAKER'S MARK DISTELLERY

Architect	Morris Workshop Architects
Installer	Carlton Roofing
Products	Tongue & Groove
Finish	Custom Color, Classic Bronze, Dark Brown, Slate Grey
State	Kentucky
Country	U.S.A

The Maker's Mark Distillery in Kentucky features a blend of Longboard Tongue & Groove planks in 6" Channel profiles, featuring a variety of finishes in Slate Grey, Dark Brown, Classic Bronze, and Black. Applied across exterior cladding, siding, and soffits, this palette of rich, earthy tones complements the distillery's historic charm while introducing a refined, modern edge

*"The goal of this project was to create a modern aesthetic that both stood out from its surroundings, while still fitting in. The inspiration for the exterior was to mimic the many tobacco barns you see on the drive through Loretto, KY to get to Makers Mark Distillery. These barns typically are built with a vertical black siding, but the effects of time create natural patterns of fading color variation, warping, and vertical slotted openings. The modern mimic of this aesthetic helped us create a structure that is clearly new, but naturally fits in with the surrounding campus much of which has been there for the past 50 years. – Morris Workshop"*

# COOLING TOWER NY

Architect	E. Yohanon
Products	Privacy Beam
Finish	National Walnut, Light Fir
State	New York
Country	U.S.A

Located in New York, Smith Haven, the cooling tower enclosure has been transformed into a visually appealing architectural feature using Longboard's Privacy Beams in a mix of Light Fir and Dark National Walnut.

These aluminum beams are applied as decorative screens and fencing around the exterior enclosure, blending functionality with modern design. The wood-tone finishes add a warm texture while maintaining airflow and concealing mechanical elements.

# SGI BUDDHIST CENTER

Architect	Ewers Architecture
Installer	Douglass Colony
Products	Tongue & Groove
Finish	Dark Fir, Onyx Black
State	Colorado
Country	U.S.A

This SGI-Buddhist Center was designed to replace a 60+ year-old building in the heart of Denver. The project features 6" V Groove throughout, walls clad in Dark Fir and peaked soffits in a dark Onyx Black, a modern expression of sustainability and serenity.

The project marks a monumental leap forward in design, efficiency, and alignment with Denver's clean-energy ambitions.

# KINGDOM CULTURE CHURCH

Architect	Equip Studio
Installer	Hembree Construction
Products	Tongue & Groove, Link & Lock
Finish	Dark National Walnut
State	Florida
Country	U.S.A

Kingdom Culture Church in Florida is a dynamic, growing faith community designed to foster connection, purpose, and belonging.

The building showcases Longboard's 6" V-Groove Tongue & Groove planks and 6" Link & Lock siding in Dark National Walnut, applied across the exterior cladding to create a rich, modern façade with natural warmth.

The combination of profiles adds visual interest and dimension while providing exceptional durability in this hot climate.

# JOHN PAUL II PASTORAL CENTRE

Architect	John Clark Architect Inc
Installer	Ventana Construction
Products	Tongue & Groove
Finish	Light Cherry
State	British Columbia
Country	Canada

This centre features layered design elements of light brick integrated with Longboard's 6-inch V-Groove Tongue & Groove planks in Light Cherry.

The aluminum boards articulate soffits, window pods, and vertical piers, tying back to West Coast architecture without the maintenance or wildfire risk of real wood.

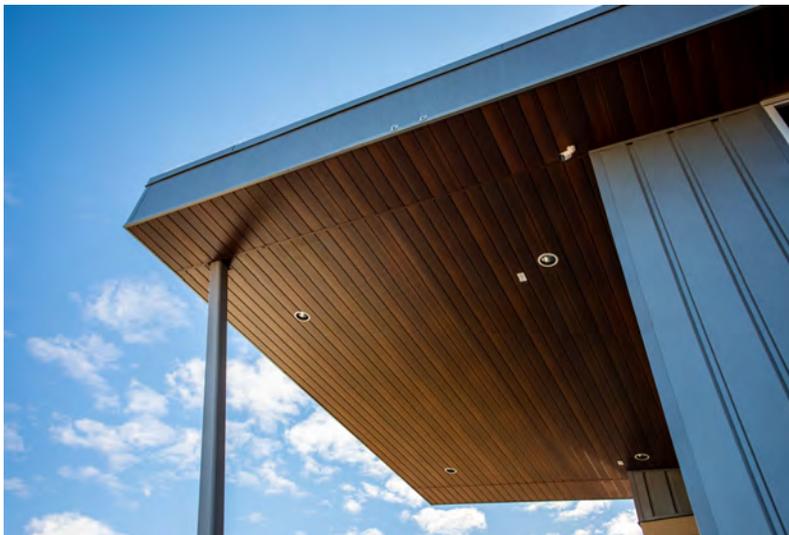

It was important for the building to exemplify fire performance, impact resistance, and zero VOCs were as critical as aesthetics. The result is a building that feels approachable, with Longboard providing a durable, color-fast accent that frames the sacred activities within.

# JOURNEY CHURCH

Architect	Lee Architects
Installer	Central States Roofing
Products	Tongue & Groove
Finish	Table Walnut
State	Colorado
Country	U.S.A

Journey Church's steel moment frames are wrapped in split-face stone and Longboard 6-inch V-Groove aluminum planks in Walnut, echoing Colorado barn siding without the wildfire risk.

The planks also appear on soffits, where their powder-coated finish resists UV fade at 6,000 ft elevation. The original cladding system remains virtually maintenance-free, validating the choice of aluminum over stained cedar.

## Achieve you Vision.

If a custom finish is required, we will work with our industry leading coating suppliers to develop a custom finish solution. All finishes are rigorously tested for corrosion and weathering resistance to ensure that it will stand up and deliver superior performance in the built environment. We perform accelerated weathering testing in our onsite laboratory and work closely with coating suppliers to review weathering results of finishes undergoing natural Florida exposure testing.

Our disciplined approach to powder coating, quality and process control distinguishes it as industry leading product manufacturer and ensures that its premium products stay looking beautiful for many, many years. The pre-treatment chemicals used by Longboard contain no chromates, cyanides, phosphates or other metals listed by the EPA or the OSHA.
